MEMORANDUM FOR Nuclear Regulatory Commission (NRC), ATTN: Penny Lanzisera,  
Medical Branch, Division of Nuclear materials Safety, Region I, King of Prussia, PA, 19406-  
1415

SUBJECT: Amendment of Addition of License Material use Area to NRC License 10-06493-02

1. This memorandum addresses the changes required by the NRC in order to update Martin Army Community Hospital's (MACH) NRC License 10-06493-02.
2. The purpose of the amendment is due to Army's planned transition to new location of Martin Army Community Hospital.
3. Effective as of 01 October 2014, Martin Army Community Hospital, United States Army Medical Department Activity, Fort Benning, GA 31905 will be relocated.
4. Please amend license number 10-06493-02 to allow the use of licensed material in the following locations in addition to those locations currently approved by the license:
  - a. Nuclear Medicine
  - b. The Radioactive Waste Storage Area
5. Enclosed is an annotated drawing of Nuclear Medicine Section and the Radioactive Waste Storage Area, Martin Army Community Replacement Hospital, and the list of available equipment, which are being used
6. Added areas of licensed materials use at Martin Army Community Replacement Hospital, where byproduct materials are used in accordance with either 35.100 or 35.200.
7. The point of contact for this memorandum is CPT Steven S. Cho, Chief, Health Physics, at 706-544-2458.

## NUCLEAR MEDICINE

Nuclear Medicine Services is located on the first floor of Martin Army Community Replacement Hospital.

1L51- "Cold" waiting area- patients are brought to the cold waiting after checking in at the main radiology reception (1N13). This is the waiting area for patients before they are dosed

1L51A & 1L51B- Dressing rooms

1L53- "Cold" Toilet

1L54- Densitometer- Bone density scanning room: contains a scanner, bone density, full body.

1L55- CT control room- contains the control equipment for the Spect CT scanner in room 1L56

1L56- Spect CT Scanning- contains Spect CT scanner, CT injector

1L57- Thyroid Uptake Room- this room is assigned to use isotopes to study problems of the thyroid gland. It contains a System Uptake, Thyroid, and an exam chair

1L58- Stress Test Room- contains a treadmill, ergometer, upperbody

1L62, 1L61 and 1L63 are Administrative Offices

1L71- Soiled Utility Room

1L72- Dosing Room

1L73- RadioPharmacy- this room is for the storage, preparation and dispensing of radiopharmaceuticals: this room contains Flood source- Cobalt, two fume hoods for radioisotopes, a gamma counter, lead-lined storage cabinets

1L73A- Radioactive Waste Storage Room- Contains two lead-lined cabinets to store radioactive waste, until the radiation is low enough to be taken to the haz-mat building

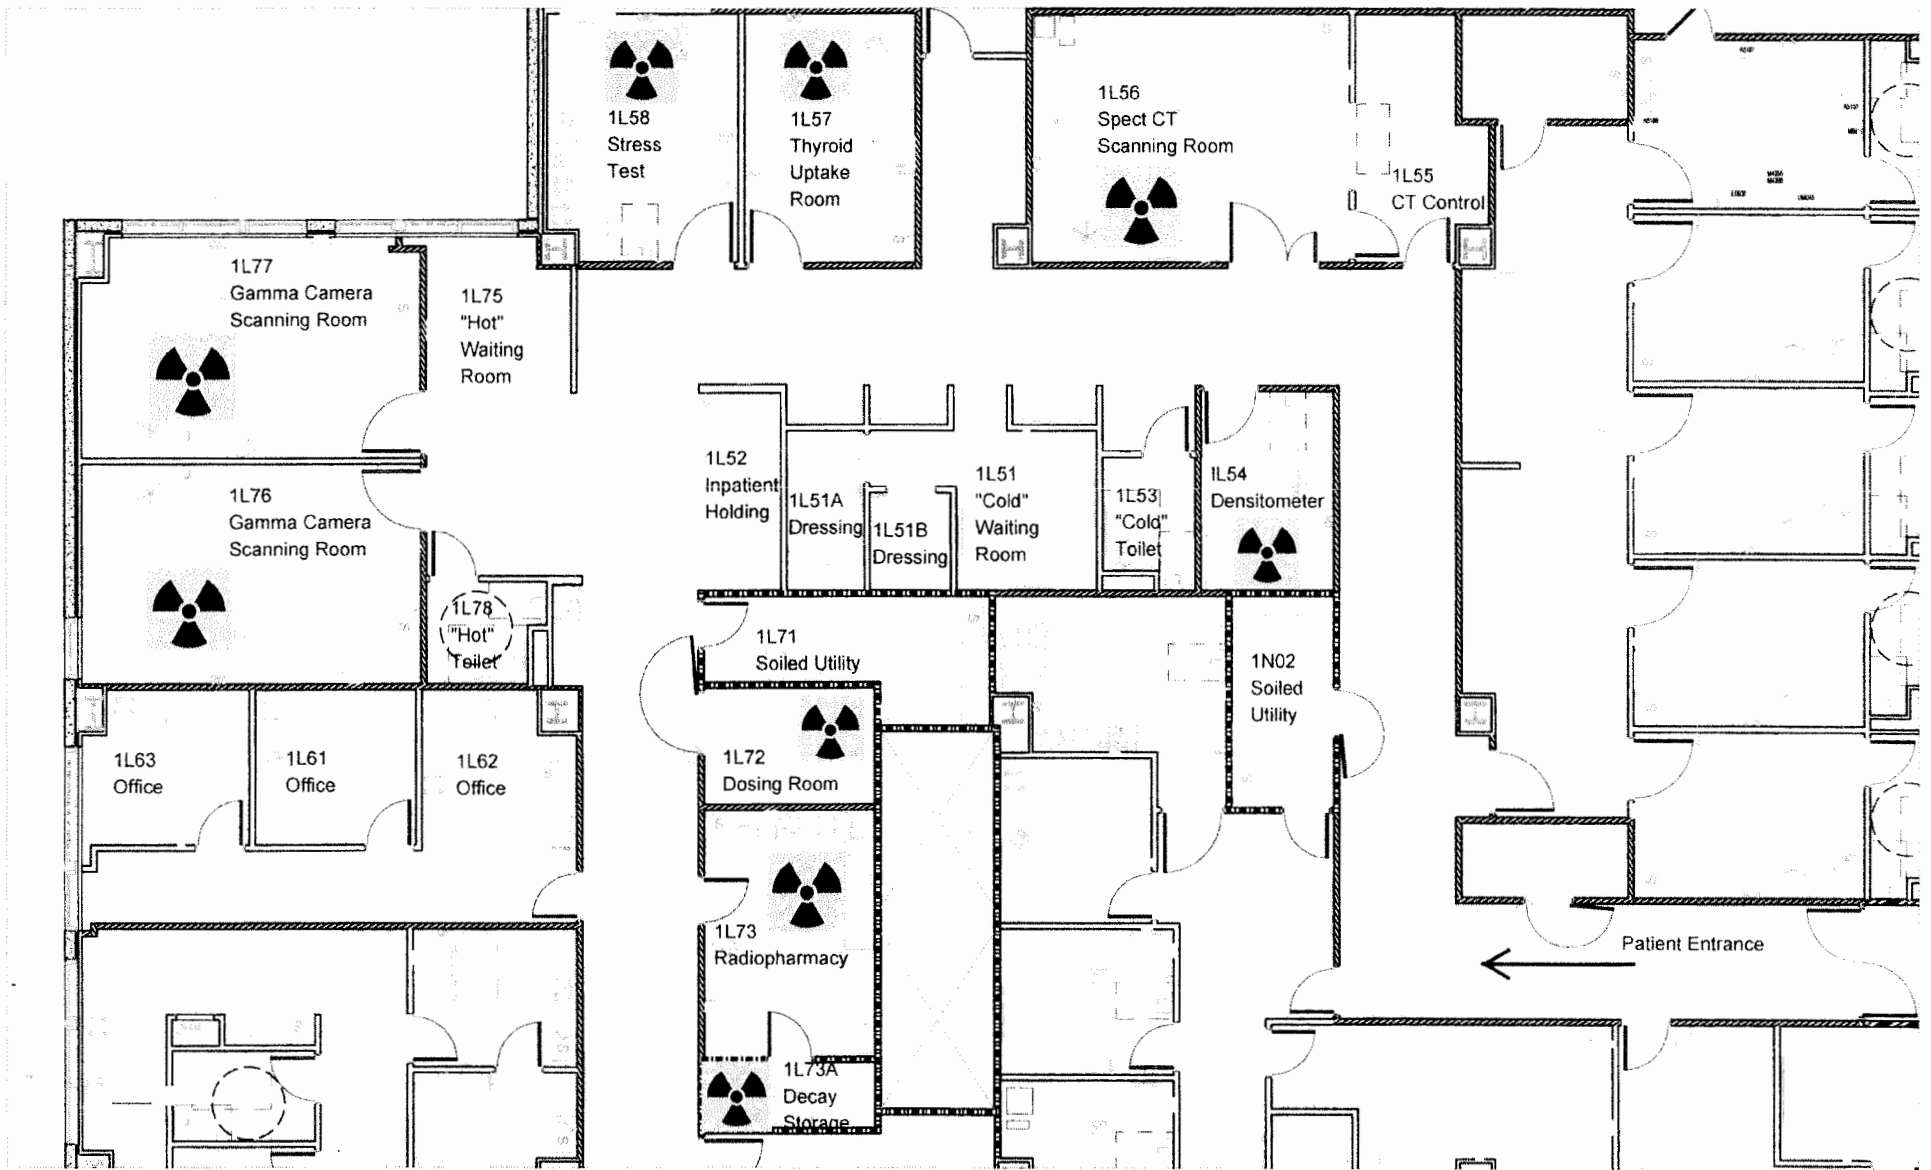

1L75- "Hot" waiting area- this is where patients will wait after they are dosed

1L76- Gamma Camera Scanning- contains a Scanner, nuclear, SPECT, Dual head, with a computer workstation

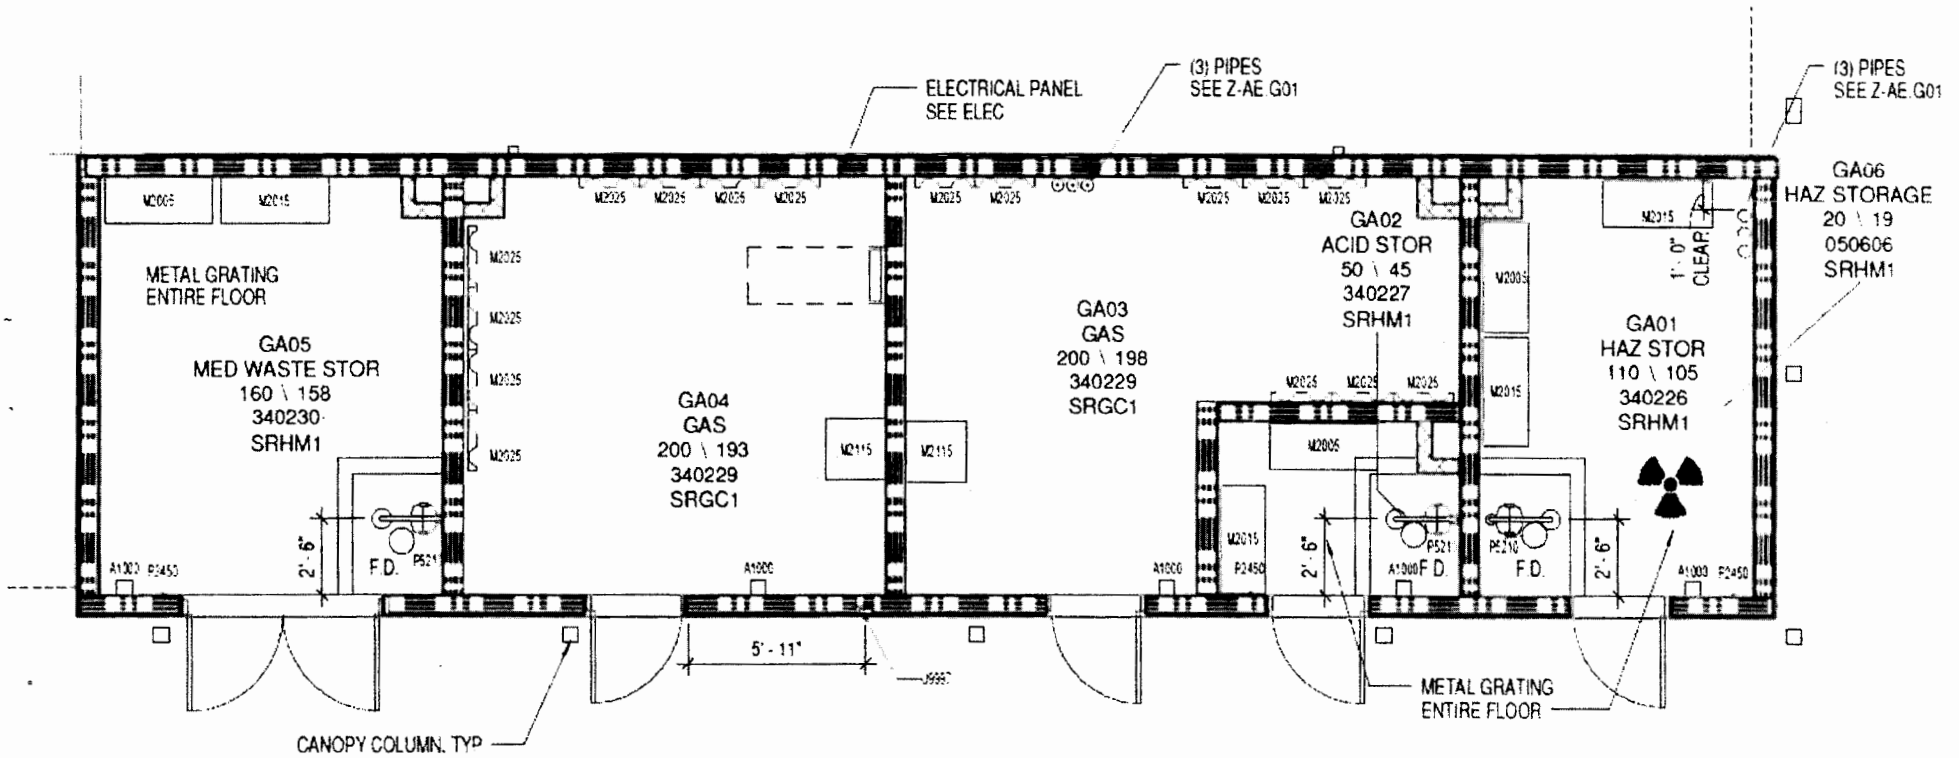

1L77- Gamma Camera Scanning- contains a Scanner, nuclear, SPECT, Dual head, with a computer workstation

1L78- "Hot" Toilet- for the use of patients who have already been dosed

Patients will enter through Corridor 1N10, and exit through either 1N10 or 1L70

Nuclear Medicine Facilities, Martin Army Replacement Hospital, Ft Benning, GA
