Evita Lagard, Administrator  
Office of Environmental Compliance  
Assessment Division Radiation Section  
Louisiana Department of Environmental Quality  
P.O. Box 4312  
Baton Rouge, LA 70821-4312

Dear Ms. Lagard:

We have reviewed the proposed changes to the Louisiana regulations in Louisiana Administrative Code, Title 33, Part XV, Radiation Protection, received by our office on March 14, 2014. We have also reviewed final regulations that were included in the March 14, 2014, letter. These regulations were reviewed by comparison to the equivalent Nuclear Regulatory Commission (NRC) rules in 10 CFR Parts 30, 31, 32, 34, 36, 39, 40, 70, 71, 150, and the requirements of the five amendments identified in the enclosed State Regulation Status (SRS) Data Sheet. We discussed our review of the regulations with Judith Schuerman on June 12, 2014.

As a result of our review of the final regulations, we have no comments. Please note that we have limited our review to regulations required for compatibility and/or health and safety. We have determined that the final regulations, as adopted, meet the compatibility and health and safety categories established in the Office of Federal and State Materials and Environmental Management Programs (FSME) Procedure SA-200, "Compatibility Categories and Health and Safety Identification for NRC Regulations and Other Program Elements."

As a result of our review of the proposed regulations, we have two comments that have been identified in the enclosure. Please note that we have limited our review to regulations required for compatibility and/or health and safety. Under our current procedure, a finding that the Louisiana regulations meet the compatibility and health and safety categories of the equivalent NRC regulation may only be made based on a review of the final Louisiana regulations. However, we have determined that if your proposed regulations were adopted, incorporating our comments and without other significant change, they would meet the compatibility and health and safety categories established in FSME Procedure SA-200, "Compatibility Categories and Health and Safety Identification for NRC Regulations and Other Program Elements."

We request that when the proposed regulations are adopted and published as final regulations, a copy of the "as published" regulations be provided to us for review. As requested in FSME Procedure SA-201, "Review of State Regulatory Requirements," please highlight the final changes, and provide a copy to Division of Materials Safety and State Agreements, FSME.

E. Lagard
