Dear Mr. Ingram:

The enclosed information regarding Pm 147 was not received from Amersham till today Friday December 9, 1988. I am therefore not faxing the information to you but will enclose it with this letter.

Next week I will be out of town till Friday December 16, 1988. If you need to contact me please leave a message with the receptionist as I check in daily.

The information sent by Amersham does answer the question about maximum source strength so you should be able to generate the requested amendment.

Yours truly,

Geoffrey J. Leighton
Radiation Safety Officer
