RE: Georgia Licenses GA-458-3G & GA-458-4G

Dear Mr. Ingram:

Sentrol Systems Inc. wishes to add another 20 mCi Sr 90 sealed source to be used in certain of our Generally Licensed Devices where the 3M 3FIL 20 mCi Sr 90 sealed sources is presently used.

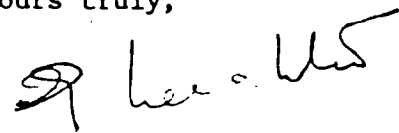

The source is an Amersham 20 mCi Sr 90 sealed source the model number is SIF.D1. The catalogue code for the 20 mCi activity is SIF.1175.

The source has been evaluated by the U.S. Nuclear Regulatory Commission and the registration number is NR136S194S dated November 24, 1980.

The devices in which the source may be used are Beta Gauges, Models TB-1, BG III, 5001 and 5002. We may also need to replace sources in the EAS Mark II.0 or C-Frame.

Should you require further information please feel free to contact me.

Yours truly,

Geoffrey J. Leighton
