Kathy,
I spoke with Terry and we think that the latter is fine. How is it all going?

Thanks,
Chris Nostrand

Chris,

Do you still need the letter dated February 29, 2012 listed on your license for the modified JLS/Foss irradiator in Michigan or can we say that your new procedures dated April 30, 2014 cover that irradiator as well?

Your license currently reads as:

Performing preventative maintenance as described in the licensee's letter dated February 29, 2012 on the modified J.L. Shepherd Mark I Model 25 irradiator.

I was thinking we might be able to say:

Performing preventative maintenance on the modified J.L. Shepherd Mark I Model 25 irradiator as described in the licensee's Preventive Maintenance Procedure GMP-002 dated April 30, 2014.

Let me know which is correct.

Thanks,

Kathy
