MEMORANDUM TO: Tom Boyce, Chief
Regulatory Guidance and Generic Issues Branch
Division of Engineering
Office of Nuclear Regulatory Research

FROM: Mark Orr, Sr. Reactor Analyst */RA/*
Regulatory Guidance and Generic Issues Branch
Division of Engineering
Office of Nuclear Regulatory Research

SUBJECT: RELEASE OF DRAFT REGULATORY GUIDE DG-1141 FOR
PUBLIC MEETING

Draft regulatory guide (DG)-1141 is proposed revision 4 of regulatory guide (RG) 1.105, "Setpoints for Safety-Related Instrumentation." The International Society of Automation (ISA) is meeting on June 6, 2014 and the lead technical author for the DG, Paul Rebstock, has requested that DG-1141 be released to the public before the meeting so it can be discussed at the meeting. The purpose of this memorandum is to make an early version of DG-1141, "Setpoints for Safety-Related Instrumentation" a publicly available draft document.

This not a final NRC document, nor does it contain official agency positions. After further NRC review, the NRC staff plans to issue the DG for public comment in accordance with existing standard procedures for developing Regulatory Guides.
