**Subject:** Acceptance Review Results Regarding TSTF-425, Rev 3, Relocate Surveillance Frequencies to Licensee Control AMD (TAC NOS. MF4065 and MF4066)

Pat,

By letter dated May 1, 2014, Calvert Cliffs Nuclear Power Plant, LLC submitted a license amendment request (LAR) that would modify the technical specifications by relocating specific surveillance frequencies to a licensee-controlled program with the implementation of Nuclear Energy Institute 04-10, "Risk Informed Method for Control of Surveillance Frequencies" for Calvert Cliffs Nuclear Power Plant, Unit Nos. 1 and 2. The purpose of this e-mail is to provide the results of the Nuclear Regulatory Commission (NRC) staff's acceptance review of this LAR and its supplement. The acceptance review was performed to determine if there is sufficient technical information in scope and depth to allow the NRC staff to complete its detailed technical review. The acceptance review is also intended to identify whether the application has any readily apparent information insufficiencies in its characterization of the regulatory requirements or the licensing basis of the plant.

The NRC staff has reviewed your application and concluded that it does provide technical information in sufficient detail to enable the NRC staff to complete its detailed technical review and make an independent assessment regarding the acceptability of the proposed amendment in terms of regulatory requirements and the protection of public health and safety and the environment. Given the lesser scope and depth of the acceptance review as compared to the detailed technical review, there may be instances in which issues that impact the NRC staff's ability to complete the detailed technical review are identified despite completion of an adequate acceptance review. If additional information is needed, you will be advised by separate correspondence.

If you have any questions, please contact me.

Thanks,  
Dee

Nadiyah S Morgan
