

3701:1-37-01 Definitions.

Terms defined in rule 3701:1-38-01 of the Administrative Code shall have the same meaning when used in this chapter except terms redefined within a given rule for use within that rule only. Additionally, the following terms as used in this chapter are defined as follows:

- (A) "Access control" means a system for allowing only approved individuals to have unescorted access to the security zone and for ensuring that all other individuals are subject to escorted access.
- (B) "Act" means the Atomic Energy Act of 1954 (68 Stat. 919), including any amendments thereto.
- (C) "Aggregated" means accessible by the breach of a single physical barrier that would allow access to radioactive material in any form, including any devices that contain the radioactive material, when the total activity equals or exceeds a category two quantity of radioactive material.
- (D) "Approved individual" means an individual whom the licensee has determined to be trustworthy and reliable for unescorted access in accordance with rules 3701:1-37-07 through 3701:1-37-13 of the Administrative Code and who has completed the training required by paragraph (C) of rule 3701:1-37-15 of the Administrative Code.
- (E) "Background investigation" means the investigation conducted by a licensee or applicant to support the determination of trustworthiness and reliability.
- (F) "Carrier" means a person engaged in the transportation of passengers or property by land or water as a common, contract, or private carrier, or by civil aircraft.
- (G) "Category one quantity of radioactive material" means a quantity of radioactive material meeting or exceeding the category one threshold in Table 1 of Appendix A to this rule. This is determined by calculating the ratio of the total activity of each radionuclide to the category one threshold for that radionuclide and adding the ratios together. If the sum is equal to or exceeds one, the quantity would be considered a category one quantity. Category one quantities of radioactive material do not include the radioactive material contained in any fuel assembly, subassembly, fuel rod, or fuel pellet.
- (H) "Category two quantity of radioactive material" means a quantity of radioactive material meeting or exceeding the category two threshold but less than the category one threshold in Table 1 of Appendix A to this rule. This is determined by calculating the ratio of the total activity of each radionuclide to the category two threshold for that radionuclide and adding the ratios together. If the sum is equal to or exceeds one, the quantity would be considered a category two quantity. Category two quantities of radioactive material do not include the radioactive material contained in any fuel assembly, subassembly, fuel rod, or fuel pellet.
- (I) "Commission" means the U.S. nuclear regulatory commission or its duly authorized representatives.
- (J) "Diversion" means the unauthorized movement of radioactive material subject to

this chapter to a location different from the material's authorized destination inside or outside of the site at which the material is used or stored.

- (K) "Escorted access" means accompaniment while in a security zone by an approved individual who maintains continuous direct visual surveillance at all times over an individual who is not approved for unescorted access.
- (L) "Fingerprint orders" means the orders issued by the U.S. nuclear regulatory commission or the legally binding requirements issued by agreement states that require fingerprints and criminal history records checks for individuals with unescorted access to category one and category two quantities of radioactive material or safeguards information-modified handling.
- (M) "Government agency" means any executive department, commission, independent establishment, corporation, wholly or partly owned by the United States of America which is an instrumentality of the United States, or any board, bureau, division, service, office, officer, authority, administration, or other establishment in the executive branch of the government.
- (N) "License issuing authority" means the licensing agency that issued the license, i.e. the U.S. nuclear regulatory commission or the appropriate agency of an agreement state.
- (O) "Local law enforcement agency" or "LLEA" means a public or private organization that has been approved by a federal, state, or local government to carry firearms and make arrests, and is authorized and has the capability to provide an armed response in the jurisdiction where the licensed category one or category two quantity of radioactive material is used, stored, or transported.
- (P) "Mobile device" means a piece of equipment containing licensed radioactive material that is either mounted on wheels or casters, or otherwise equipped for moving without a need for disassembly or dismounting; or designed to be hand carried. Mobile devices do not include stationary equipment installed in a fixed location.
- (Q) "Movement control center" means an operations center that is remote from transport activity and that maintains position information on the movement of radioactive material, receives reports of attempted attacks or thefts, provides a means for reporting these and other problems to appropriate agencies and can request and coordinate appropriate aid.
- (R) "No-later-than arrival time" means the date and time that the shipping licensee and receiving licensee have established as the time at which an investigation will be initiated if the shipment has not arrived at the receiving facility. The no-later-than-arrival time may not be more than six hours after the estimated arrival time for shipments of category two quantities of radioactive material.
- (S) "Reviewing official" means the individual who shall make the trustworthiness and reliability determination of an individual to determine whether the individual may have, or continue to have, unescorted access to the category one or category two quantities of radioactive materials that are possessed by the licensee.
- (T) "Sabotage" means deliberate damage, with malevolent intent, to a category one or category two quantity of radioactive material, a device that contains a category one or category two quantity of radioactive material, or the components of the security system.

- (U) "Safe haven" means a readily recognizable and readily accessible site at which security is present or from which, in the event of an emergency, the transport crew can notify and wait for the local law enforcement authorities.
- (V) "Security zone" means any temporary or permanent area determined and established by the licensee for the physical protection of category one or category two quantities of radioactive material.
- (W) "State" means a state of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands.
- (X) "Telemetric position monitoring system" means a data transfer system that captures information by instrumentation and/or measuring devices about the location and status of a transport vehicle or package between the departure and destination locations.
- (Y) "Trustworthiness and reliability" are characteristics of an individual considered dependable in judgment, character, and performance, such that unescorted access to category one or category two quantities of radioactive material by that individual does not constitute an unreasonable risk to the public health and safety or security. A determination of trustworthiness and reliability for this purpose is based upon the results from a background investigation.
- (Z) "Unescorted access" means solitary access to an aggregated category one or category two quantity of radioactive material or the devices that contain the material.
- (AA) "United States", when used in a geographical sense, includes Puerto Rico and all territories and possessions of the United States.

3701:1-37-02 Purpose.

This chapter has been established to provide the requirements for the physical protection program for any licensee that possesses an aggregated category one or category two quantity of radioactive material listed in Appendix A of rule 3701:1-37-01. These requirements provide reasonable assurance of the security of category one or category two quantities of radioactive material by protecting these materials from theft or diversion. Specific requirements for access to material, use of material, transfer of material, and transport of material are included. No provision of this chapter authorizes possession of licensed material.

3701:1-37-07 Personnel access authorization requirements for category one or category two quantities of radioactive material.

(A) General:

- (1) Each licensee that possesses an aggregated quantity of radioactive material at or above the category two threshold shall establish, implement, and maintain its access authorization program in accordance with requirements of this chapter.
- (2) An applicant for a new license and each licensee that would become newly subject to the requirements of this chapter upon application for modification of its license shall implement the requirements of this chapter, as appropriate, before taking possession of an aggregated category one or category two quantity of radioactive material.
- (3) Any licensee that has not previously implemented the security orders or been subject to the provisions of rules 3701:1-37-07 through 3701:1-37-13 of the Administrative Code shall implement these rules before aggregating radioactive material to a quantity that equals or exceeds the category two threshold.

(B) General performance objective: the licensee's access authorization program must ensure that the individuals specified in paragraph (C)(1) of this rule are trustworthy and reliable.

(C) Applicability:

- (1) Licensees shall subject the following individuals to an access authorization program:
 - (a) Any individual whose assigned duties require unescorted access to category one or category two quantities of radioactive material or to any device that contains the radioactive material; and
 - (b) Reviewing officials.
- (2) Licensees need not subject the categories of individuals listed in rule 3701:1-37-11 of the Administrative Code to the investigation elements of the access authorization program.
- (3) Licensees shall approve unescorted access to category one or category two quantities of radioactive material only for those individuals with job duties that require unescorted access to category one or category two quantities of radioactive material.
- (4) Licensees may include individuals needing access to safeguards information in the access authorization program under rules 3701:1-37-07 through 3701:1-37-13 of the Administrative Code.

3701:1-37-08 Access authorization program requirements.

(A) Granting unescorted access authorization:

- (1) Licensees shall implement the requirements of this rule for granting initial or reinstated unescorted access authorization.
- (2) Individuals who have been determined to be trustworthy and reliable shall also complete the security training required by paragraph (C) of rule 3701:1-37-15 of the Administrative Code before being allowed unescorted access to category one or category two quantities of radioactive material.

(B) Reviewing officials:

- (1) Reviewing officials are the only individuals who may make trustworthiness and reliability determinations that allow individuals to have unescorted access to category one or category two quantities of radioactive materials possessed by the licensee.
- (2) Each licensee shall name one or more individuals to be reviewing officials. After completing the background investigation on the reviewing official, the licensee shall provide under oath or affirmation, a certification that the reviewing official is deemed trustworthy and reliable by the licensee. The fingerprints of the named reviewing official must be taken by a law enforcement agency, federal or state agencies that provide fingerprinting services to the public, or commercial fingerprinting services authorized by a state to take fingerprints. The licensee shall recertify that the reviewing official is deemed trustworthy and reliable every ten years in accordance with paragraph (B) of rule 3701:1-37-09 of the Administrative Code.
- (3) Reviewing officials must be permitted to have unescorted access to category one or category two quantities of radioactive materials or access to safeguards information or safeguards information-modified handling, if the licensee possesses safeguards information or safeguards information-modified handling.
- (4) Reviewing officials cannot approve other individuals to act as reviewing officials.
- (5) A reviewing official does not need to undergo a new background investigation before being named by the licensee as the reviewing official if:
 - (a) The individual has undergone a background investigation that included fingerprinting and a federal bureau of investigation (FBI) criminal history records check and has been determined to be trustworthy and reliable by the licensee; or
 - (b) The individual is subject to a category listed in paragraph (A) of rule 3701:1-37-11 of the Administrative Code.

(C) Informed consent:

- (1) Licensees may not initiate a background investigation without the informed and signed consent of the subject individual. This consent must include authorization to share personal information with other individuals or organizations as

necessary to complete the background investigation. Before a final adverse determination, the licensee shall provide the individual with an opportunity to correct any inaccurate or incomplete information that is developed during the background investigation. Licensees do not need to obtain signed consent from those individuals that meet the requirements of paragraph (B) of rule 3701:1-37-09 of the Administrative Code. A signed consent must be obtained prior to any reinvestigation.

- (2) The subject individual may withdraw his or her consent at any time. Licensees shall inform the individual that:
 - (a) If an individual withdraws his or her consent, the licensee may not initiate any elements of the background investigation that were not in progress at the time the individual withdrew his or her consent; and
 - (b) The withdrawal of consent for the background investigation is sufficient cause for denial or termination of unescorted access authorization.
- (D) Personal history disclosure: any individual who is applying for unescorted access authorization shall disclose the personal history information that is required by the licensee's access authorization program for the reviewing official to make a determination of the individual's trustworthiness and reliability. Refusal to provide, or the falsification of, any personal history information required by this chapter is sufficient cause for denial or termination of unescorted access.
- (E) Determination basis:
 - (1) The reviewing official shall determine whether to permit, deny, unfavorably terminate, maintain, or administratively withdraw an individual's unescorted access authorization based on an evaluation of all of the information collected to meet the requirements of this chapter.
 - (2) The reviewing official may not permit any individual to have unescorted access until the reviewing official has evaluated all of the information collected to meet the requirements of this chapter and determined that the individual is trustworthy and reliable. The reviewing official may deny unescorted access to any individual based on information obtained at any time during the background investigation.
 - (3) The licensee shall document the basis for concluding whether or not there is reasonable assurance that an individual is trustworthy and reliable.
 - (4) The reviewing official may terminate or administratively withdraw an individual's unescorted access authorization based on information obtained after the background investigation has been completed and the individual has been granted unescorted access authorization.
 - (5) Licensees shall maintain a list of persons currently approved for unescorted access authorization. When a licensee determines that a person no longer requires unescorted access or meets the access authorization requirement, the licensee shall remove the person from the approved list as soon as possible, but no later than seven working days, and take prompt measures to ensure that the individual is unable to have unescorted access to the material.
- (F) Procedures: licensees shall develop, implement, and maintain written procedures for

implementing the access authorization program. The procedures must include provisions for the notification of individuals who are denied unescorted access. The procedures must include provisions for the review, at the request of the affected individual, of a denial or termination of unescorted access authorization. The procedures must contain a provision to ensure that the individual is informed of the grounds for the denial or termination of unescorted access authorization and allow the individual an opportunity to provide additional relevant information.

(G) Right to correct and complete information:

- (1) Prior to any final adverse determination, licensees shall provide each individual subject to this chapter with the right to complete, correct, and explain information obtained as a result of the licensee's background investigation. Confirmation of receipt by the individual of this notification must be maintained by the licensee for a period of one year from the date of the notification.
- (2) If, after reviewing his or her criminal history record, an individual believes that it is incorrect or incomplete in any respect and wishes to change, correct, update, or explain anything in the record, the individual may initiate challenge procedures. These procedures include direct application by the individual challenging the record to the law enforcement agency that contributed the questioned information or a direct challenge as to the accuracy or completeness of any entry on the criminal history record to the "Federal Bureau of Investigation, Criminal Justice Information Services (CJIS) Division, ATTN: SCU, Mod. D-2, 1000 Custer Hollow Road, Clarksburg, WV 26306" as published in 28 CFR 16.30 through 16.34, Code of Federal Regulations, July 1, 2013. In the latter case, the FBI will forward the challenge to the agency that submitted the data, and will request that the agency verify or correct the challenged entry. Upon receipt of an official communication directly from the agency that contributed the original information, the FBI identification division makes any changes necessary in accordance with the information supplied by that agency. Licensees must provide at least ten days for an individual to initiate action to challenge the results of an FBI criminal history records check after the record being made available for his or her review. The licensee may make a final adverse determination based upon the criminal history records only after receipt of the FBI's confirmation or correction of the record.

(H) Records:

- (1) The licensee shall retain documentation regarding the trustworthiness and reliability of individual employees for three years from the date the individual no longer requires unescorted access to category one or category two quantities of radioactive material.
- (2) The licensee shall retain a copy of the current access authorization program procedures as a record for three years after the procedure is no longer needed. If any portion of the procedure is superseded, the licensee shall retain the superseded material for three years after the record is superseded.
- (3) The licensee shall retain the list of persons approved for unescorted access authorization for three years after the list is superseded or replaced.

3701:1-37-09 Background investigations.

- (A) Initial investigation: before allowing an individual unescorted access to category one or category two quantities of radioactive material or to the devices that contain the material, licensees shall complete a background investigation of the individual seeking unescorted access authorization. The scope of the investigation must encompass at least the seven years preceding the date of the background investigation or since the individual's eighteenth birthday, whichever is shorter. The background investigation must include at a minimum:
- (1) Fingerprinting and an FBI identification and criminal history records check in accordance with rule 3701:1-37-10 of the Administrative Code;
 - (2) Verification of true identity: licensees shall verify the true identity of the individual who is applying for unescorted access authorization to ensure that the applicant is who he or she claims to be. A licensee shall review official identification documents (e.g., driver's license; passport; government identification; certificate of birth issued by the state, province, or country of birth) and compare the documents to personal information data provided by the individual to identify any discrepancy in the information. Licensees shall document the type, expiration, and identification number of the identification document, or maintain a photocopy of identifying documents on file in accordance with rule 3701:1-37-12 of the Administrative Code. Licensees shall certify in writing that the identification was properly reviewed, and shall maintain the certification and all related documents for review upon inspection;
 - (3) Employment history verification: licensees shall complete an employment history verification, including military history. Licensees shall verify the individual's employment with each previous employer for the most recent seven years before the date of application;
 - (4) Verification of education: licensees shall verify that the individual participated in the education process during the claimed period;
 - (5) Character and reputation determination: licensees shall complete reference checks to determine the character and reputation of the individual who has applied for unescorted access authorization. Unless other references are not available, reference checks may not be conducted with any person who is known to be a close member of the individual's family, including but not limited to the individual's spouse, parents, siblings, or children, or any individual who resides in the individual's permanent household. Reference checks under this chapter must be limited to whether the individual has been and continues to be trustworthy and reliable;
 - (6) The licensee shall also, to the extent possible, obtain independent information to corroborate that information provided by the individual (e.g., seek references not supplied by the individual); and
 - (7) If a previous employer, educational institution, or any other entity with which the individual claims to have been engaged fails to provide information or indicates an inability or unwillingness to provide information within a time frame deemed appropriate by the licensee but at least after ten business days of the

request or if the licensee is unable to reach the entity, the licensee shall document the refusal, unwillingness, or inability in the record of investigation; and attempt to obtain the information from an alternate source.

(B) Grandfathering:

- (1) Individuals who have been determined to be trustworthy and reliable for unescorted access to category one or category two quantities of radioactive material under the fingerprint orders may continue to have unescorted access to category one and category two quantities of radioactive material without further investigation. These individuals shall be subject to the reinvestigation requirement.
- (2) Individuals who have been determined to be trustworthy and reliable under the provisions of 10 CFR 73 as published in 10 CFR 73, Code of Federal Regulations, January 1, 2012 or the security orders for access to safeguards information, safeguards information-modified handling, or risk-significant material may have unescorted access to category one and category two quantities of radioactive material without further investigation. The licensee shall document that the individual was determined to be trustworthy and reliable under the provisions of 10 CFR 73 or a security order. Security order, in this context, refers to any order that was issued by the U.S. nuclear regulatory commission that required fingerprints and a FBI criminal history records check for access to safeguards information, safeguards information-modified handling, or risk significant material such as special nuclear material or large quantities of uranium hexafluoride. These individuals shall be subject to the reinvestigation requirement.

- (C) Reinvestigations: licensees shall conduct a reinvestigation every ten years for any individual with unescorted access to category one or category two quantities of radioactive material. The reinvestigation shall consist of fingerprinting and a FBI identification and criminal history records check in accordance with rule 3701:1-37-10 of the Administrative Code. The reinvestigations must be completed within ten years of the date on which these elements were last completed.

3701:1-37-10 Requirements for criminal history records checks of individuals granted unescorted access to category one or category two quantities of radioactive material.

(A) General performance objectives and requirements:

- (1) Except for those individuals listed in rule 3701:1-37-11 of the Administrative Code and those individuals grandfathered under paragraph (B) of rule 3701:1-37-09 of the Administrative Code, each licensee subject to the provisions of this chapter shall fingerprint each individual who is to be permitted unescorted access to category one or category two quantities of radioactive material. Licensees shall transmit all collected fingerprints to the U. S. nuclear regulatory commission for transmission to the FBI. The licensee shall use the information received from the FBI as part of the required background investigation to determine whether to grant or deny further unescorted access to category one or category two quantities of radioactive materials for that individual.
- (2) The licensee shall notify each affected individual that his or her fingerprints will be used to secure a review of his or her criminal history record, and shall inform him or her of the procedures for revising the record or adding explanations to the record.
- (3) Fingerprinting is not required if a licensee is reinstating an individual's unescorted access authorization to category one or category two quantities of radioactive materials if:
 - (a) The individual returns to the same facility that granted unescorted access authorization within three hundred sixty-five days of the termination of his or her unescorted access authorization; and
 - (b) The previous access was terminated under favorable conditions.
- (4) Fingerprints do not need to be taken if an individual who is an employee of a licensee, contractor, manufacturer, or supplier has been granted unescorted access to category one or category two quantities of radioactive material, access to safeguards information, or safeguards information-modified handling by another licensee, based upon a background investigation conducted under this chapter, the fingerprint orders, or as published in 10 CFR 73, Code of Federal Regulations, January 1, 2012. An existing criminal history records check file may be transferred to the licensee asked to grant unescorted access in accordance with the provisions of paragraph (C) of rule 3701:1-37-12 of the Administrative Code.
- (5) Licensees shall use the information obtained as part of a criminal history records check solely for the purpose of determining an individual's suitability for unescorted access authorization to category one or category two quantities of radioactive materials, access to safeguards information, or safeguards information-modified handling.

(B) Prohibitions:

- (1) Licensees may not base a final determination to deny an individual unescorted

access authorization to category one or category two quantities of radioactive material solely on the basis of information received from the FBI involving:

- (a) An arrest more than one year old for which there is no information of the disposition of the case; or
 - (b) An arrest that resulted in dismissal of the charge or an acquittal.
- (2) Licensees may not use information received from a criminal history records check obtained under this chapter in a manner that would infringe upon the rights of any individual under the first amendment to the Constitution of the United States, nor shall licensees use the information in any way that would discriminate among individuals on the basis of race, religion, national origin, gender, or age.
- (C) Procedures for processing of fingerprint checks:
- (1) For the purpose of complying with this chapter, licensees shall submit to the "Director, Division of Facilities and Security, U.S. Nuclear Regulatory Commission, 11545 Rockville Pike, Rockville, Maryland 20852-2738, ATTN: Criminal History Program, Mail Stop T-03B46M", one completed, legible standard fingerprint card (Form FD-258, ORIMDNRCOOOZ), electronic fingerprint scan or, where practicable, other fingerprint record for each individual requiring unescorted access to category one or category two quantities of radioactive material. Copies of these forms may be obtained by writing the "Office of Information Services, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001", by calling "(630)829-9565", or by email to "FORMS.Resource@nrc.gov". Guidance on submitting electronic fingerprints can be found at <http://www.nrc.gov/site-help/e-submittals.html>.
 - (2) Fees for the processing of fingerprint checks are due upon application. Licensees shall submit payment with the application for the processing of fingerprints through corporate check, certified check, cashier's check, money order, or electronic payment, made payable to "U.S. NRC". (For guidance on making electronic payments, contact the "Security Branch, Division of Facilities and Security at (301) 492-3531". Combined payment for multiple applications is acceptable. The U.S. nuclear regulatory commission publishes the amount of the fingerprint check application fee on the NRC public web site. To find the current fee amount, go to the electronic submittals page at <http://www.nrc.gov/site-help/e-submittals.html> and see the link for the "Criminal History Program under Electronic Submission Systems".
 - (3) The U. S. nuclear regulatory commission will forward to the submitting licensee all data received from the FBI as a result of the licensee's application(s) for criminal history records checks.

3701:1-37-11

Relief from fingerprinting, identification, and criminal history records checks and other elements of background investigations for designated categories of individuals permitted unescorted access to certain radioactive materials.

- (A) Fingerprinting, and the identification and criminal history records checks required by section 149 of the Atomic Energy Act of 1954, as amended, and this chapter, and other elements of the background investigation are not required for the following individuals prior to granting unescorted access to category one or category two quantities of radioactive materials:
- (1) An employee of the U.S. nuclear regulatory commission or of the executive branch of the U.S. government who has undergone fingerprinting for a prior U.S. government criminal history records check;
 - (2) A member of congress;
 - (3) An employee of a member of congress or congressional committee who has undergone fingerprinting for a prior U.S. government criminal history records check;
 - (4) The governor of a state or his or her designated state employee representative;
 - (5) Federal, state, or local law enforcement personnel;
 - (6) State radiation control program directors and state homeland security advisors or their designated state employee representatives;
 - (7) Agreement state employees conducting security inspections on behalf of the U.S. nuclear regulatory commission under an agreement executed under section 274.i. of the Atomic Energy Act;
 - (8) Representatives of the international atomic energy agency (IAEA) engaged in activities associated with the U.S./IAEA safeguards agreement who have been certified by the U.S. nuclear regulatory commission;
 - (9) Emergency response personnel who are responding to an emergency;
 - (10) Commercial vehicle drivers for road shipments of category two quantities of radioactive material;
 - (11) Package handlers at transportation facilities such as freight terminals and railroad yards;
 - (12) Any individual who has an active federal security clearance, provided that he or she makes available the appropriate documentation. Written confirmation from the agency/employer that granted the federal security clearance or reviewed the criminal history records check must be provided to the licensee. The licensee shall retain this documentation for a period of three years from the date the individual no longer requires unescorted access to category one or category two quantities of radioactive material; and
 - (13) Any individual employed by a service provider licensee for which the service

provider licensee has conducted the background investigation for the individual and approved the individual for unescorted access to category one or category two quantities of radioactive material. Written verification from the service provider must be provided to the licensee. The licensee shall retain the documentation for a period of three years from the date the individual no longer requires unescorted access to category one or category two quantities of radioactive material.

- (B) Fingerprinting, and the identification and criminal history records checks required by section 149 of the Atomic Energy Act of 1954, as amended, are not required for an individual who has had a favorably adjudicated U.S. government criminal history records check within the last five years, under a comparable U.S. government program involving fingerprinting and an FBI identification and criminal history records check provided that he or she makes available the appropriate documentation. Written confirmation from the agency/employer that reviewed the criminal history records check must be provided to the licensee. The licensee shall retain this documentation for a period of three years from the date the individual no longer requires unescorted access to category one or category two quantities of radioactive material. These programs include, but are not limited to:
- (1) National agency check;
 - (2) Transportation worker identification credentials (TWIC) under 49 CFR 1572, as published in Code of Federal Regulations, October 1, 2012;
 - (3) Bureau of alcohol, tobacco, firearms, and explosives background check and clearances under 27 CFR 555, as published in Code of Federal Regulations, April 1, 2013
 - (4) Health and human services security risk assessments for possession and use of select agents and toxins under 10 CFR 73, as published in Code of Federal Regulations, January 1, 2012;
 - (5) Hazardous material security threat assessment for hazardous material endorsement to commercial driver's license under 49 CFR 1572 as published in Code of Federal Regulations, October 1, 2012; and
 - (6) Customs and border protection's free and secure trade (FAST) program.

3701:1-37-13 Access authorization program review.

- (A) Each licensee shall be responsible for the continuing effectiveness of the access authorization program. Each licensee shall ensure that access authorization programs are reviewed to confirm compliance with the requirements of this chapter and that comprehensive actions are taken to correct any noncompliance that is identified. The review program shall evaluate all program performance objectives and requirements. Each licensee shall periodically (at least annually) review the access program content and implementation.
- (B) The results of the reviews, along with any recommendations, must be documented. Each review report must identify conditions that are adverse to the proper performance of the access authorization program, the cause of the condition(s), and, when appropriate, recommend corrective actions, and corrective actions taken. The licensee shall review the findings and take any additional corrective actions necessary to preclude repetition of the condition, including reassessment of the deficient areas where indicated.
- (C) Review records must be maintained for three years.

3701:1-37-14 Security program.

(A) Applicability:

- (1) Each licensee that possesses an aggregated category one or category two quantity of radioactive material shall establish, implement, and maintain a security program in accordance with the requirements of this chapter.
- (2) An applicant for a new license and each licensee that would become newly subject to the requirements of this chapter upon application for modification of its license shall implement the requirements of this chapter, as appropriate, before taking possession of an aggregated category one or category two quantity of radioactive material.
- (3) Any licensee that has not previously implemented the security orders or been subject to the provisions of rules 3701:1-37-14 to 3701:1-37-22 of the Administrative Code shall provide written notification to the director at the location specified in rule 3701:1-40-04 of the Administrative Code at least ninety days before aggregating radioactive material to a quantity that equals or exceeds the category two threshold.

(B) General performance objective: each licensee shall establish, implement, and maintain a security program that is designed to monitor and, without delay, detect, assess, and respond to an actual or attempted unauthorized access to category one or category two quantities of radioactive material.

(C) Program features: each licensee's security program must include the program features, as appropriate, described in rule 3701:1-37-15 to 3701:1-37-21 of the Administrative Code.

3701:1-37-15 General security program requirements.

(A) Security plan:

- (1) Each licensee identified in paragraph (A) of rule 3701:1-37-14 of the Administrative Code shall develop a written security plan specific to its facilities and operations. The purpose of the security plan is to establish the licensee's overall security strategy to ensure the integrated and effective functioning of the security program required by this chapter. The security plan must, at a minimum:
 - (a) Describe the measures and strategies used to implement the requirements of this chapter; and
 - (b) Identify the security resources, equipment, and technology used to satisfy the requirements of this chapter.
- (2) The security plan must be reviewed and approved by the individual with overall responsibility for the security program.
- (3) A licensee shall revise its security plan as necessary to ensure the effective implementation of Ohio department of health requirements. The licensee shall ensure that:
 - (a) The revision has been reviewed and approved by the individual with overall responsibility for the security program; and
 - (b) The affected individuals are instructed on the revised plan before the changes are implemented.
- (4) The licensee shall retain a copy of the current security plan as a record for three years after the security plan is no longer required. If any portion of the plan is superseded, the licensee shall retain the superseded material for three years after the record is superseded.

(B) Implementing procedures:

- (1) The licensee shall develop and maintain written procedures that document how the requirements of this chapter and the security plan will be met.
- (2) The implementing procedures and revisions to these procedures must be approved in writing by the individual with overall responsibility for the security program.
- (3) The licensee shall retain a copy of the current procedure as a record for three years after the procedure is no longer needed. Superseded portions of the procedure must be retained for three years after the record is superseded.

(C) Training:

- (1) Each licensee shall conduct training to ensure that those individuals implementing the security program possess and maintain the knowledge, skills, and abilities to carry out their assigned duties and responsibilities effectively. The training must include instruction in:

- (a) The licensee's security program and procedures to secure category one or category two quantities of radioactive material, and in the purposes and functions of the security measures employed;
 - (b) The responsibility to report promptly to the licensee any condition that causes or may cause a violation of department requirements;
 - (c) The responsibility of the licensee to report promptly to the local law enforcement agency (LLEA) and licensee any actual or attempted theft, sabotage, or diversion of category one or category two quantities of radioactive material; and
 - (d) The appropriate response to security alarms.
- (2) In determining those individuals who shall be trained on the security program, the licensee shall consider each individual's assigned activities during authorized use and response to potential situations involving actual or attempted theft, diversion, or sabotage of category one or category two quantities of radioactive material. The extent of the training must be commensurate with the individual's potential involvement in the security of category one or category two quantities of radioactive material.
- (3) Refresher training must be provided at a frequency not to exceed twelve months and when significant changes have been made to the security program. This training must include:
- (a) Review of the training requirements of paragraph (C) of this rule and any changes made to the security program since the last training;
 - (b) Reports on any relevant security issues, problems, and lessons learned;
 - (c) Relevant results of Ohio department of health inspections; and
 - (d) Relevant results of the licensee's program review and testing and maintenance.
- (4) The licensee shall maintain records of the initial and refresher training for three years from the date of the training. The training records must include dates of the training, topics covered, a list of licensee personnel in attendance, and related information.
- (D) Protection of information:
- (1) Licensees authorized to possess category one or category two quantities of radioactive material shall limit access to and unauthorized disclosure of their security plan, implementing procedures, and the list of individuals that have been approved for unescorted access.
 - (2) Efforts to limit access shall include the development, implementation, and maintenance of written policies and procedures for controlling access to, and for proper handling and protection against unauthorized disclosure of, the security plan and implementing procedures.
 - (3) Before granting an individual access to the security plan or implementing procedures, licensees shall:

- (a) Evaluate an individual's need to know the security plan or implementing procedures; and
 - (b) If the individual has not been authorized for unescorted access to category one or category two quantities of radioactive material, safeguards information, or safeguards information- modified handling, the licensee must complete a background investigation to determine the individual's trustworthiness and reliability. A trustworthiness and reliability determination shall be conducted by the reviewing official and shall include the background investigation elements contained in rule 3701:1-37-09 of the Administrative Code.
- (4) Licensees need not subject the following individuals to the background investigation elements for protection of information:
- (a) The categories of individuals listed in rule 3701:1-37-11 of the Administrative Code; or
 - (b) Security service provider employees, provided written verification that the employee has been determined to be trustworthy and reliable, by the required background investigation in rule 3701:1-37-09 of the Administrative Code, has been provided by the security service provider.
- (5) The licensee shall document the basis for concluding that an individual is trustworthy and reliable and should be granted access to the security plan or implementing procedures.
- (6) Licensees shall maintain a list of persons currently approved for access to the security plan or implementing procedures. When a licensee determines that a person no longer needs access to the security plan or implementing procedures or no longer meets the access authorization requirements for access to the information, the licensee shall remove the person from the approved list as soon as possible, but no later than seven working days, and take prompt measures to ensure that the individual is unable to obtain the security plan or implementing procedures.
- (7) When not in use, the licensee shall store its security plan and implementing procedures in a manner to prevent unauthorized access. Information stored in nonremovable electronic form must be password protected.
- (8) The licensee shall retain as a record for three years after the document is no longer needed:
- (a) A copy of the information protection procedures; and
 - (b) The list of individuals approved for access to the security plan or implementing procedures.

3701:1-37-16 LLEA coordination.

- (A) A licensee subject to this chapter shall coordinate, to the extent practicable, with an LLEA for responding to threats to the licensee's facility, including any necessary armed response. The information provided to the LLEA must include:
 - (1) A description of the facilities and the category one and category two quantities of radioactive materials along with a description of the licensee's security measures that have been implemented to comply with this chapter; and
 - (2) A notification that the licensee will request a timely armed response by the LLEA to any actual or attempted theft, sabotage, or diversion of category one or category two quantities of material.
 - (3) A notification that provides a description of the facilities and the category one and category two quantities of radioactive materials along with a description of the licensee's security measures is not public record pursuant to R.C. 149.433 (exemption of security records).
- (B) The licensee shall notify the director within three business days if:
 - (1) The LLEA has not responded to the request for coordination within sixty days of the coordination request; or
 - (2) The LLEA notifies the licensee that the LLEA does not plan to participate in coordination activities.
- (C) The licensee shall document its efforts to coordinate with the LLEA. The documentation must be kept for three years.
- (D) The licensee shall coordinate with the LLEA at least every twelve months, or when changes to the facility design or operation adversely affect the potential vulnerability of the licensee's material to theft, sabotage, or diversion.

3701:1-37-17 Security zones.

- (A) Licensees shall ensure that all aggregated category one and category two quantities of radioactive material are used or stored within licensee-established security zones. Security zones may be permanent or temporary.
- (B) Temporary security zones must be established as necessary to meet the licensee's transitory or intermittent business activities, such as periods of maintenance, source delivery, and source replacement.
- (C) Security zones must, at a minimum, allow unescorted access only to approved individuals through:
 - (1) Isolation of category one and category two quantities of radioactive materials by the use of continuous physical barriers that allow access to the security zone only through established access control points. A physical barrier is a natural or man-made structure or formation sufficient for the isolation of the category one or category two quantities of radioactive material within a security zone; or
 - (2) Direct control of the security zone by approved individuals at all times; or
 - (3) A combination of continuous physical barriers and direct control.
- (D) For category one quantities of radioactive material during periods of maintenance, source receipt, preparation for shipment, installation, or source removal or exchange, the licensee shall, at a minimum, provide sufficient individuals approved for unescorted access to maintain continuous surveillance of sources in temporary security zones and in any security zone in which physical barriers or intrusion detection systems have been disabled to allow such activities.
- (E) Individuals not approved for unescorted access to category one or category two quantities of radioactive material must be escorted by an approved individual when in a security zone.

3701:1-37-18 Monitoring, detection, and assessment.

(A) Monitoring and detection:

(1) Licensees shall establish and maintain the capability to continuously monitor and detect without delay all unauthorized entries into its security zones. Licensees shall provide the means to maintain continuous monitoring and detection capability in the event of a loss of the primary power source, or provide for an alarm and response in the event of a loss of this capability to continuously monitor and detect unauthorized entries.

(2) Monitoring and detection must be performed by:

- (a) A monitored intrusion detection system that is linked to an onsite or offsite central monitoring facility;
- (b) Electronic devices for intrusion detection alarms that will alert nearby facility personnel;
- (c) A monitored video surveillance system;
- (d) Direct visual surveillance by approved individuals located within the security zone; or
- (e) Direct visual surveillance by a licensee designated individual located outside the security zone.

(3) A licensee subject to this chapter shall also have a means to detect unauthorized removal of the radioactive material from the security zone. This detection capability must provide:

- (a) For category one quantities of radioactive material, immediate detection of any attempted unauthorized removal of the radioactive material from the security zone. Such immediate detection capability must be provided by:
 - (i) Electronic sensors linked to an alarm;
 - (ii) Continuous monitored video surveillance; or
 - (iii) Direct visual surveillance.
- (b) For category two quantities of radioactive material, weekly verification through physical checks, tamper indicating devices, use, or other means to ensure that the radioactive material is present.

(B) Assessment: licensees shall immediately assess each actual or attempted unauthorized entry into the security zone to determine whether the unauthorized access was an actual or attempted theft, sabotage, or diversion.

(C) Personnel communications and data transmission: for personnel and automated or electronic systems supporting the licensee's monitoring, detection, and assessment systems, licensees shall:

- (1) Maintain continuous capability for personnel communication and electronic data transmission and processing among site security systems; and
- (2) Provide an alternative communication capability for personnel, and an alternative data transmission and processing capability, in the event of a loss of the primary means of communication or data transmission and processing. Alternative communications and data transmission systems may not be subject to the same failure modes as the primary systems.
- (D) Response: licensees shall immediately respond to any actual or attempted unauthorized access to the security zones, or actual or attempted theft, sabotage, or diversion of category one or category two quantities of radioactive material at licensee facilities or temporary job sites. For any unauthorized access involving an actual or attempted theft, sabotage, or diversion of category one or category two quantities of radioactive material, the licensee's response shall include requesting, without delay, an armed response from the LLEA.

3701:1-37-19 Maintenance and testing.

- (A) Each licensee subject to this chapter shall implement a maintenance and testing program to ensure that intrusion alarms, associated communication systems, and other physical components of the systems used to secure or detect unauthorized access to radioactive material are maintained in operable condition and are capable of performing their intended function when needed. The equipment relied on to meet the security requirements of this chapter must be inspected and tested for operability and performance at the manufacturer's suggested frequency. If there is no suggested manufacturer's suggested frequency, the testing must be performed at least annually, not to exceed twelve months.
- (B) The licensee shall maintain records on the maintenance and testing activities for three years.

Each licensee that possesses mobile devices containing category one or category two quantities of radioactive material must:

- (A) Have two independent physical controls that form tangible barriers to secure the material from unauthorized removal when the device is not under direct control and constant surveillance by the licensee; and
- (B) For devices in or on a vehicle or trailer, unless the health and safety requirements for a site prohibit the disabling of the vehicle, the licensee shall utilize a method to disable the vehicle or trailer when not under direct control and constant surveillance by the licensee. Licensees shall not rely on the removal of an ignition key to meet this requirement.

3701:1-37-23**Additional requirements for transfer of category one and category two quantities of radioactive material.**

A licensee transferring a category one or category two quantity of radioactive material to a licensee of the U. S. nuclear regulatory commission or an agreement state shall meet the license verification provisions listed below instead of those listed in rule 3701:1-40-19 of the Administrative Code:

- (A) Any licensee transferring category one quantities of radioactive material to a licensee of the U. S. nuclear regulatory commission or an agreement state, prior to conducting such transfer, shall verify with the U.S. nuclear regulatory commission's license verification system or the license issuing authority that the transferee's license authorizes the receipt of the type, form, and quantity of radioactive material to be transferred and that the licensee is authorized to receive radioactive material at the location requested for delivery. If the verification is conducted by contacting the license issuing authority, the transferor shall document the verification. For transfers within the same organization, the licensee does not need to verify the transfer.
- (B) Any licensee transferring category two quantities of radioactive material to a licensee of the U. S. nuclear regulatory commission or an agreement state, prior to conducting such transfer, shall verify with the U.S. nuclear regulatory commission's license verification system or the license issuing authority that the transferee's license authorizes the receipt of the type, form, and quantity of radioactive material to be transferred. If the verification is conducted by contacting the license issuing authority, the transferor shall document the verification. For transfers within the same organization, the licensee does not need to verify the transfer.
- (C) In an emergency where the licensee cannot reach the license issuing authority and the license verification system is nonfunctional, the licensee may accept a written certification by the transferee that it is authorized by license to receive the type, form, and quantity of radioactive material to be transferred. The certification must include the license number, current revision number, issuing agency, expiration date, and for a category one shipment the authorized address. The licensee shall keep a copy of the certification. The certification must be confirmed by use of the U.S. nuclear regulatory commission's license verification system or by contacting the license issuing authority by the end of the next business day.
- (D) The transferor shall keep a copy of the verification documentation as a record for three years.

Effective: 10/01/2014

3701:1-37-26

Advance notification of shipment of category one quantities of radioactive material.

As specified in paragraphs (A) and (B) of this rule, each licensee shall provide advance notification to the director and the governor of a state, or the governor's designee, of the shipment of licensed material in a category one quantity, through or across the boundary of the state, before the transport, or delivery to a carrier for transport of the radioactive material outside the confines of the licensee's facility or other place of use or storage.

(A) Procedures for submitting advance notification:

- (1) The notification must be made to the U.S. nuclear regulatory commission (NRC) and to the office of each appropriate governor or governor's designee. The contact information, including telephone and mailing addresses, of governors and governor's designees, is available on the NRC website at <http://nrc-stp.ornl.gov/special/designee.pdf>. A list of the contact information is also available upon request from the "director, Division of Intergovernmental Liaison and Rulemaking, Office of Federal and State Materials and Environmental Management Programs, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001". Notifications to the NRC must be to the NRC's "Director, Division of Security Policy, Office of Nuclear Security and Incident Response, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001". The notification to the NRC may be made by e-mail to RAMQC SHIPMENTS@nrc.gov or by fax to (301)816-5151.
- (2) A notification delivered by mail must be postmarked at least seven days before transport of the shipment commences at the shipping facility.
- (3) A notification delivered by any means other than mail must reach the director at least four days before the transport of the shipment commences and must reach the office of the governor or the governor's designee at least four days before transport of a shipment within or through the state.

(B) Information to be furnished in advance notification of shipment: Each advance notification of shipment of category one quantities of radioactive material must contain the following information, if available at the time of notification:

- (1) The name, address, and telephone number of the shipper, carrier, and receiver of the category one radioactive material;
- (2) The license numbers of the shipper and receiver;
- (3) A description of the radioactive material contained in the shipment, including the radionuclides and quantity;
- (4) The point of origin of the shipment and the estimated time and date that shipment will commence;
- (5) The estimated time and date that the shipment is expected to enter each state along the route;
- (6) The estimated time and date of arrival of the shipment at the destination; and

- (7) A point of contact, with a telephone number, for current shipment information.
- (C) Revision notice:
- (1) The licensee shall provide any information not previously available at the time of the initial notification, as soon as the information becomes available but not later than commencement of the shipment, to the governor of the state or the governor's designee and to the NRC's "Director of Nuclear Security, Office of Nuclear Security and Incident Response, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001".
 - (2) A licensee shall promptly notify the governor of the state or the governor's designee of any such changes to the information provided in accordance with paragraphs (B) and (C)(1) of this rule. The licensee shall also immediately notify the NRC's "Director, Division of Security Policy, Office of Nuclear Security and Incident Response, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001" of any such changes.
- (D) Cancellation notice: each licensee who cancels a shipment for which the advance notification has been sent shall send a cancellation notice to the governor of each state or to the governor's designee previously notified and to the NRC's "Director, Division of Security Policy, Office of Nuclear Security and Incident Response, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001". The licensee shall send the cancellation notice before the shipment would have commenced or as soon thereafter as possible. The licensee shall state in the notice that it is a cancellation and identify the advance notification that is being canceled.
- (E) Records: the licensee shall retain a copy of the advance notification and any revision and cancellation notices as a record for three years.

3701:1-37-27 Requirements for physical protection of category one and category two quantities of radioactive material during shipment.

(A) Shipments by road:

- (1) Each licensee who transports, or delivers to a carrier for transport, in a single shipment, a category one quantity of radioactive material shall:
 - (a) Ensure that movement control centers are established that maintain position information from a remote location. These control centers must monitor shipments twenty-four hours a day, seven days a week, and have the ability to communicate immediately, in an emergency, with the appropriate law enforcement agencies.
 - (b) Ensure that redundant communications are established that allow the transport to contact the escort vehicle (when used) and movement control center at all times. Redundant communications may not be subject to the same interference factors as the primary communication.
 - (c) Ensure that shipments are continuously and actively monitored by a telemetric position monitoring system or an alternative tracking system reporting to a movement control center. A movement control center must provide positive confirmation of the location, status, and control over the shipment. The movement control center must be prepared to promptly implement preplanned procedures in response to deviations from the authorized route or a notification of actual, attempted, or suspicious activities related to the theft, loss, or diversion of a shipment. These procedures will include, but not be limited to, the identification of and contact information for the appropriate LLEA along the shipment route.
 - (d) Provide an individual to accompany the driver for those highway shipments with a driving time period greater than the maximum number or allowable hours of service in a twenty-four hour duty day as established by the United States department of transportation federal motor carrier safety administration. The accompanying individual may be another driver.
 - (e) Develop written normal and contingency procedures to address:
 - (i) Notifications to the communication center and law enforcement agencies;
 - (ii) Communication protocols: Communication protocols must include a strategy for the use of authentication codes and duress codes and provisions for refueling or other stops, detours, and locations where communication is expected to be temporarily lost;
 - (iii) Loss of communications; and
 - (iv) Responses to an actual or attempted theft or diversion of a shipment.
 - (f) Each licensee who makes arrangements for the shipments for category one quantities of radioactive material shall ensure that drivers, accompanying

personnel, and movement control center personnel have access to the normal and contingency procedures.

- (2) Each licensee that transports category two quantities of radioactive material shall maintain constant control and/or surveillance during transit and have the capability for immediate communication to summon appropriate response or assistance.
 - (3) Each licensee who delivers to a carrier for transport, in a single shipment, a category two quantity of radioactive material shall:
 - (a) Use carriers that have established package tracking systems. An established package tracking system is a documented, proven, and reliable system routinely used to transport objects of value. In order for a package tracking system to maintain constant control and/or surveillance, the package tracking system must allow the shipper or transporter to identify when and where the package was last and when it should arrive at the next point of control.
 - (b) Use carriers that maintain constant control and/or surveillance during transit and have the capability for immediate communication to summon appropriate response or assistance; and
 - (c) Use carriers that have established tracking systems that require an authorized signature prior to releasing the package for delivery or return.
- (B) Shipments by rail:
- (1) Each licensee who transports, or delivers to a carrier for transport, in a single shipment, a category one quantity of radioactive material shall:
 - (a) Ensure that rail shipments are monitored by a telemetric position monitoring system or an alternative tracking system reporting to the licensee, third-party, or railroad communications center. The communications center shall provide positive confirmation of the location of the shipment and its status. The communications center shall implement preplanned procedures in response to deviations from the authorized route or to a notification of actual, attempted, or suspicious activities related to the theft or diversion of a shipment. These procedures will include, but not be limited to, the identification of and contact information for the appropriate LLEA along the shipment route.
 - (b) Ensure that periodic reports to the communications center are made at preset intervals.
 - (2) Each licensee who transports, or delivers to a carrier for transport, in a single shipment, a category two quantity of radioactive material shall:
 - (a) Use carriers that have established package tracking systems. An established package tracking system is a documented, proven, and reliable system routinely used to transport objects of value. In order for a package tracking system to maintain constant control and/or surveillance, the package tracking system must allow the shipper or transporter to identify when and where the package was last and when it should arrive at the next point of control.

- (b) Use carriers that maintain constant control and/or surveillance during transit and have the capability for immediate communication to summon appropriate response or assistance; and
 - (c) Use carriers that have established tracking systems that require an authorized signature prior to releasing the package for delivery of return.
- (C) Investigations: each licensee who makes arrangements for shipment of category one quantities of radioactive material shall immediately conduct an investigation upon the discovery that a category one shipment is lost or missing. Each licensee who makes arrangements for the shipment of category two quantities of radioactive material shall immediately conduct an investigation, in coordination with the receiving licensee, of any shipment that has not arrived by the designated no-later-than arrival time.

3701:1-37-28 Reporting of transportation event.

- (A) The shipping licensee shall notify the appropriate LLEA and the director in accordance with rule 3701:1-37-05 of the Administrative Code within one hour of its determination that a shipment of category one quantities of radioactive material is lost or missing. The appropriate LLEA would be the law enforcement agency in the area of the shipment's last confirmed location. During the investigation required by paragraph (C) of rule 3701:1-37-27 of the Administrative Code, the shipping licensee will provide agreed upon updates to the director on the status of the investigation.
- (B) The shipping licensee shall notify the director in accordance with rule 3701:1-37-05 of the Administrative Code within four hours of its determination that a shipment of category two quantities of radioactive material is lost or missing. If, after twenty-four hours of its determination that the shipment is lost or missing, the radioactive material has not been located and secured, the licensee shall immediately notify the director.
- (C) The shipping licensee shall notify the designated LLEA along the shipment route as soon as possible upon discovery of any actual or attempted theft or diversion of a shipment or suspicious activities related to the theft or diversion of a shipment of a category one quantity of radioactive material. As soon as possible after notifying the LLEA, the licensee shall notify the director in accordance with rule 3701:1-37-05 of the Administrative Code upon discovery of any actual or attempted theft or diversion of a shipment, or any suspicious activity related to the shipment of category one radioactive material.
- (D) The shipping licensee shall notify the director in accordance with rule 3701:1-37-05 of the Administrative Code as soon as possible upon discovery of any actual or attempted theft or diversion of a shipment, or any suspicious activity related to the shipment, of a category two quantity of radioactive material.
- (E) The shipping licensee shall notify the director in accordance with rule 3701:1-37-05 of the Administrative Code and the LLEA as soon as possible upon recovery of any lost or missing category one quantities of radioactive material.
- (F) The shipping licensee shall notify the director in accordance with rule 3701:1-37-05 of the Administrative Code as soon as possible upon recovery of any lost or missing category two quantities of radioactive materials.
- (G) The initial telephonic notification required by paragraphs (A) through (D) of this rule must be followed within a period of thirty days by a written report submitted to the director by an appropriate method listed in rule 3701:1-37-04 of the Administrative Code. A written report is not required for notifications on suspicious activities required by paragraphs (C) and (D) of this rule. In addition, the licensee shall provide one copy of the written report addressed to the "Director, Division of Security Policy, Office of Nuclear Security and Incident Response, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001". The report must set forth the following information:
 - (1) A description of the licensed material involved, including kind, quantity, and chemical and physical form;

- (2) A description of the circumstances under which the loss or theft occurred;
 - (3) A statement of disposition, or probable disposition, of the licensed material involved;
 - (4) Actions that have been taken, or will be taken, to recover the material; and
 - (5) Procedures or measures that have been, or will be, adopted to ensure against a recurrence of the loss or theft of licensed material.
- (H) Subsequent to filing the written report, the licensee shall also report any additional substantive information on the loss or theft within thirty days after the licensee learns of such information.

3701:1-37-29 Form of records.

Each record required by this chapter must be legible throughout the retention period specified in this chapter. The record may be the original or a reproduced copy or a microform, provided that the copy or microform is authenticated by authorized personnel and that the microform is capable of producing a clear copy throughout the required retention period. The record may also be stored in electronic media with the capability for producing legible, accurate, and complete records during the required retention period. Records such as letters, drawings, and specifications, must include all pertinent information such as stamps, initials, and signatures. The licensee shall maintain adequate safeguards against tampering with and loss of records.

3701:1-37-30 Record retention.

Licenses shall maintain the records that are required by the rules in this chapter for the period specified by the appropriate rule. If a retention period is not otherwise specified, these records must be retained until the director terminates the facility's license. All records related to this chapter may be destroyed upon director's termination of the facility's license.

Appendix A

Category 1 and Category 2 Radioactive Materials

Table 1—Category 1 and Category 2 Threshold

The terabecquerel (TBq) values are the regulatory standard. The curie (Ci) values specified are obtained by converting from the TBq value. The curie values are provided for practical usefulness only.

Radioactive material	Category 1 (TBq)	Category 1 (Ci)	Category 2 (TBq)	Category 2 (Ci)
Americium-241	60	1,620	0.6	16.2
Americium-241/Be	60	1,620	0.6	16.2
Californium-252	20	540	0.2	5.40
Cobalt-60	30	810	0.3	8.10
Curium-244	50	1,350	0.5	13.5
Cesium-137	100	2,700	1	27.0
Gadolinium-153	1,000	27,000	10	270
Iridium-192	80	2,160	0.8	21.6
Plutonium-238	60	1,620	0.6	16.2
Plutonium-239/Be	60	1,620	0.6	16.2
Promethium-147	40,000	1,080,000	400	10,800
Radium-226	40	1,080	0.4	10.8
Selenium-75	200	5,400	2	54.0
Strontium-90	1,000	27,000	10	270
Thulium-170	20,000	540,000	200	5,400
Ytterbium-169	300	8,100	3	81.0

Note: *Calculations Concerning Multiple Sources or Multiple Radionuclides*

The "sum of fractions" methodology for evaluating combinations of multiple sources or multiple radionuclides is to be used in determining whether a location meets or exceeds the threshold and is thus subject to the requirements of this part.

I. If multiple sources of the same radionuclide and/or multiple radionuclides are aggregated at a location, the sum of the ratios of the total activity of each of the radionuclides must be determined to verify whether the activity at the location is less than the category 1 or category 2 thresholds of Table 1, as appropriate. If the calculated sum of the ratios, using the equation below, is greater than or equal to 1.0, then the applicable requirements of this part apply.

II. First determine the total activity for each radionuclide from Table 1. This is done by adding the activity of each individual source, material in any device, and any loose or bulk material that contains the radionuclide. Then use the equation below to calculate the sum of the ratios by inserting the total activity of the applicable radionuclides from Table 1 in the numerator of the equation and the corresponding threshold activity from Table 1 in the denominator of the equation.

Calculations must be performed in metric values (i.e., TBq) and the numerator and denominator values must be in the same units.

R_1 = total activity for radionuclide 1

R_2 = total activity for radionuclide 2

R_N = total activity for radionuclide n

AR_1 = activity threshold for radionuclide 1

AR_2 = activity threshold for radionuclide 2

AR_N = activity threshold for radionuclide n

$$\sum_1^n \left[\frac{R_1}{AR_1} + \frac{R_2}{AR_2} + \frac{R_n}{AR_n} \right] \geq 1.0$$
