East Impoundment (Evaporation Pond) Leak Monthly Update, Cameco Resources, Smith Ranch-Highland Uranium Project, Permit to Mine No. 633

Dear Mr. Rogaczewski:

Power Resources, Inc. d/b/a Cameco Resources (Cameco) is herein providing a monthly update to the Wyoming Department of Environmental Quality, Land Quality Division (LQD) and the Nuclear Regulatory Commission (NRC) regarding a leak into secondary containment (sump) discovered on November 4, 2011 at the East Impoundment, referred to as Evaporation Pond in Permit 633. LQD Permit 633 Volume I, Operations Plan, Section 3.7.5, and NRC License Section 5.3.6 state "A written report will be submitted to LQD and NRC within 30 days after the notification of the suspected leak and every 30 days thereafter until the leak is repaired".

Cameco began removing sediment material from the impoundment in May and will continue the operation in June. Installation of the new liner will be conducted once completed. No water has been present in the east sump and no samples have been collected since June 19, 2013. The east sump will continue to be monitored and if liquid is present the appropriate samples will be obtained.

Please contact me at (307) 358-6541 ext. 476 or Kenneth_Garoutte@cameco.com if you have questions.

Sincerely,

A handwritten signature in black ink, appearing to read 'Ken Garoutte', written over a horizontal line.

Ken Garoutte
