June 18, 2014

Mr. Glenn Ford
Vice President for Finance and Administration
Oregon State University
640 Kerr Administration
Corvallis, OR 97331-2156

SUBJECT: AMENDMENT 1 TO SPECIAL NUCLEAR MATERIAL LICENSE SNM-2013
(TECHNICAL ASSIGNMENT CONTROL NUMBER L33331)

Dear Mr. Ford:

The U.S. Nuclear Regulatory Commission (NRC) received an application for possession and use of Special Nuclear Material (SNM) from Oregon State University (OSU) on October 22, 2009, and a license, valid for 10 years, was issued on August 29, 2011. The OSU requested the license to acquire single fuel elements from 5 research reactors to conduct experiments at the Radiation Center at OSU. Recent communication with the Radiation Safety Officer (RSO) at OSU has identified that OSU has yet to receive any of the materials under this license. Further, the RSO reports that OSU is unlikely to receive any materials under this license until 2017. Due to the unplanned gap between licensing and prospective receipt of material, and with the concurrence of the OSU RSO, the following condition is being added to the OSU license:

13. At least 60 days prior to receipt of special nuclear material, the licensee shall notify, in writing, the Director, Division of Nuclear Materials Safety, U.S. Nuclear Regulatory Commission Region IV, 1600 E. Lamar Blvd., Arlington, Texas 76011, that the licensee plans to receive materials authorized by this license. The receipt and use of any special nuclear material pertinent to License SNM-2013 shall not occur until the Commission completes an Operational Readiness Review to verify that the licensee is meeting the commitments made in the application for the license for the storage and use of the special nuclear materials.

All other conditions of the license remain unchanged. Public and non-public versions of the license are attached.

Document transmitted contains Security Related Information. When separated from Enclosure 2, this document is decontrolled.
