Annual Assessment Open House

Reactor Oversight Process – CY 2013

Nuclear Regulatory Commission – Region III

Cordova, Illinois

June 17, 2014

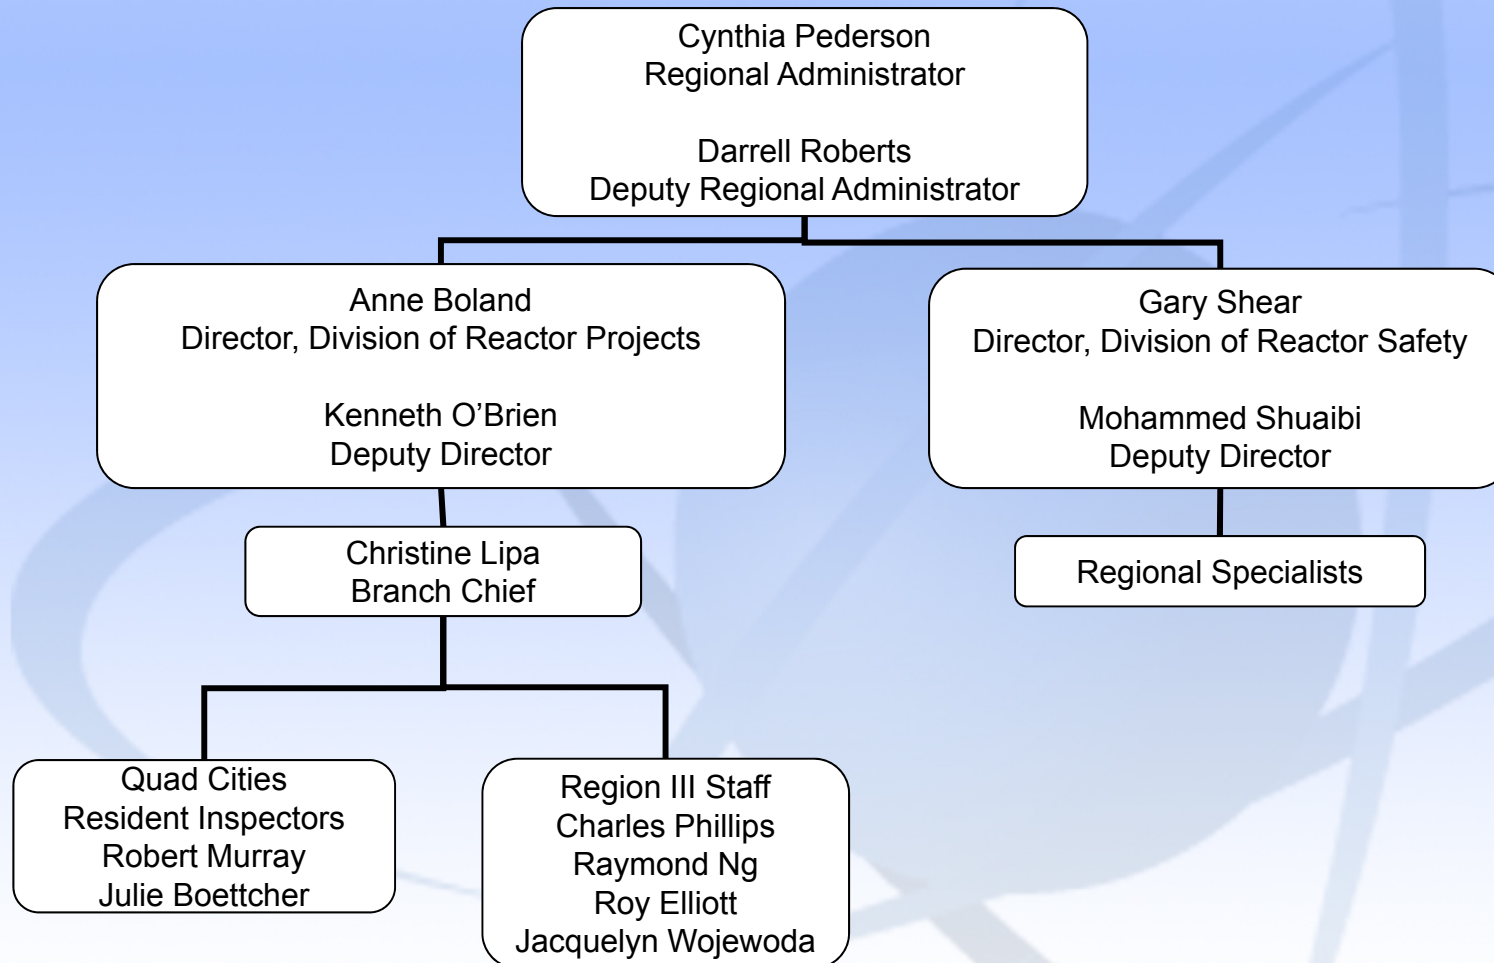

Purpose of Today's Open House

- **A public forum for discussion of the licensee's performance in 2013**
- **NRC will discuss the Reactor Oversight Process and the inspection activities at Quad Cities Nuclear Power Station**

Region III Organization

Our Mission

- **To license and regulate the nation's civilian use of byproduct, source, and special nuclear materials to ensure adequate protection of public health and safety, promote the common defense and security, and protect the environment**

Some Nuclear Facts

- 100* nuclear power plants supply about 20 percent of the electricity in the U.S
- Nuclear materials are used in medicine for diagnosis and cancer treatment
- Nuclear materials are widely used in industry, such as in density gauges, flow measurement devices, radiography devices, and irradiators

* As of December 31, 2013

The NRC Regulates

- **Nuclear reactors**
 - commercial power reactors, research and test reactors, new reactor designs
- **Nuclear materials**
 - nuclear reactor fuel, radioactive materials for medical, industrial, and academic use
- **Nuclear waste**
 - transportation, storage and disposal of nuclear material and waste, decommissioning of nuclear facilities
- **Nuclear security**
 - physical security of nuclear facilities and materials from sabotage or attacks

What We Don't Do

- **Regulate nuclear weapons, military reactors, or space vehicle reactors**
- **Own or operate nuclear power plants**
- **Regulate some radioactive materials, such as X-rays and naturally occurring radon**

How We Regulate

- **Establish rules and regulations**
- **Issue licenses**
- **Provide oversight through inspection, enforcement, and evaluation of operational experience**
- **Conduct research to provide support for regulatory decisions**
- **Respond to events and emergencies**

Assurance of Plant Safety

- **Require “defense-in-depth”**
- **Require long-term maintenance of equipment**
- **Require continual training of operators**
- **Verify compliance with regulations**

What We Do – Nuclear Waste

- **The NRC regulates:**
 - Storage of spent reactor fuel in fuel pools or dry storage casks
 - Any national spent fuel storage site

What We Do – Nuclear Security

- **NRC Requires:**
 - Well-armed and well-trained security forces
 - Surveillance and perimeter patrols
 - State-of-the-art site access equipment and controls
 - Physical barriers and detection zones
 - Intrusion detection systems and alarm stations

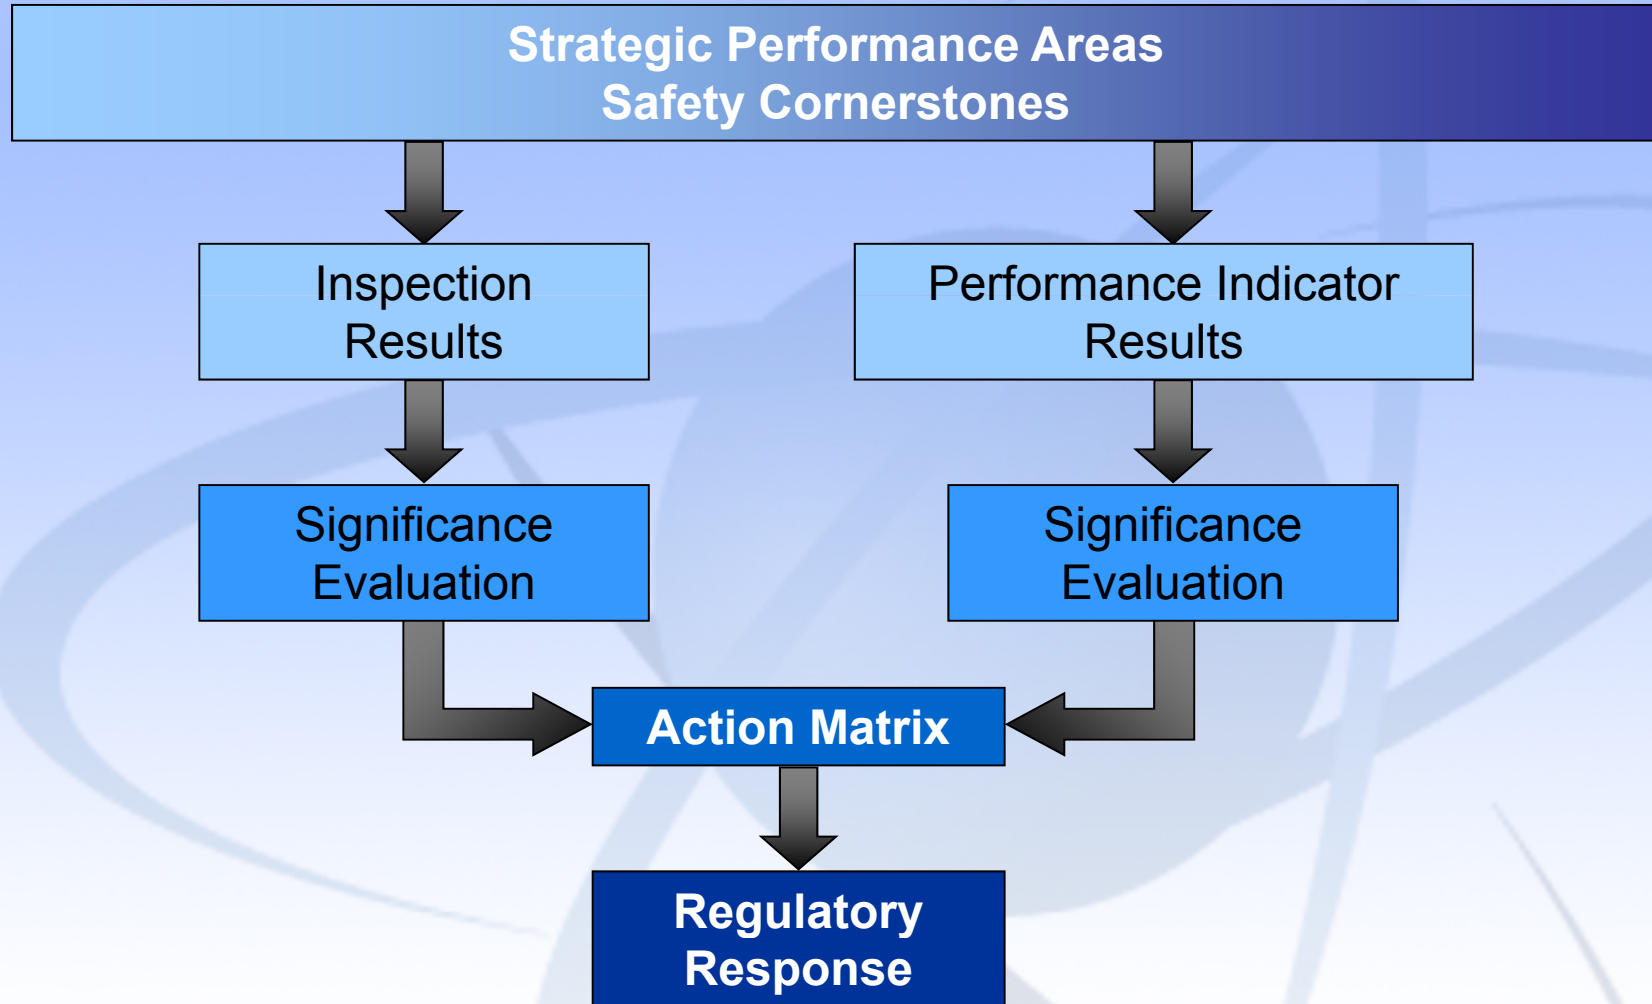

NRC Performance Goals

- **Safety**
 - Ensure adequate protection of public health and safety and the environment
- **Security**
 - Ensure adequate protection in the secure use and management of radioactive materials

Reactor Oversight Process

Examples of Baseline Inspections

- **Equipment Alignment** ~80 hrs/yr
- **Emergency Preparedness** ~80 hrs/yr
- **Worker Radiation Protection** ~95 hrs/yr
