Christophe Reullon, Quality Manager
Valinox Nucleaire
5,avenue du Maréchal Leclerc
21500 Montbard, France

SUBJECT: MULTINATIONAL DESIGN EVALUATION PROGRAM VENDOR INSPECTION OF
VALINOX NUCLEAIRE

Dear Mr. Reullon:

This letter documents the Nuclear Regulatory Commission (NRC) staff's plan to lead a multinational inspection of the Valinox Nucleaire Company at your Montbard, France facility to review implementation of your quality assurance program. The inspection will be conducted in accordance with the Multinational Design Evaluation Program (MDEP) Protocol Document. As a guide for the scope of this inspection, the team will utilize the MDEP Quality Assurance (QA)/Quality Control (QC) Criteria. These criteria represent quality assurance requirements common to all of the involved countries, but will not represent a complete review consistent with any single countries requirements. The team will be focused on the review of aspects of your QA program as it pertains to safety-related activities associated with the fabrication of steam generator tubes. As discussed during a conference call with you on March 25, 2014, the inspectors, represented by France, the United Kingdom, and the United States, plan to arrive at your facility on Monday, July 7, 2014, and will conduct the inspection through Friday, July 11, 2014. Subsequent to the inspection, a report will be issued and transmitted to you via letter. The lead inspector for this effort is Mr. Greg Galletti, you may contact him at (301) 415-1831 or via electronic mail at Greg.Galletti@nrc.gov.

The following docket number has been assigned to your facility: 99901447. Please reference this number on any correspondence sent to the NRC

Sincerely,

/RA/

Richard A. Rasmussen, Chief
Electrical Vendor Inspection Branch
Division of Construction Inspection
and Operational Programs
Office of New Reactors
