**Subject:** RE: NRC license amendment  
**Attachments:** Quintiles RSO Delegation of Authority - 12Jun14.pdf; ATT00001.txt

Hi again Bryan, sorry I misspelled your name earlier. I am attaching what I think will do as the "Delegation of Authority" that you requested. Myself and the outgoing RSO generated and filled out this form prior to her departure from the company and I just had our site director add his signature to it. Thanks Bryan, I'll talk to you soon!

Shane Lowery  
Scientist 1 - Biotransformation  
Radiation Safety Officer

**To:** Shane Lowery  
**Subject:** NRC license amendment

Hey Shane,

Left you a voice-mail on this, but thought I'd e-mail too. I am reviewing the request to list you as the RSO on the NRC license and removing Natalie Russell. I need a couple of things in order to continue that review.

- 1) Please provide me a brief description of your use of radioactive materials with isotopes and general amounts used; and
- 2) I need a "Delegation of Authority" or something similar from your management showing that they have appointed you as RSO. Normally, the appointee also signs it accepting the appointment and indicating that they understand their duties and responsibilities as RSO.

You can respond by email. Please attach the requested info as a PDF file since it needs to be **signed**.

If you have any questions, please let me know.

Bryan

**Memo: Regarding Radiation Safety Officer Update**

To whom it may concern:

The role of Radiation Safety Officer (RSO) and all the responsibilities associated with the position are being transferred from Natalie Russell to Shane Lowery officially beginning May 16, 2014. An amendment reflecting this change has been submitted to the NRC dated April 21, 2014 and acknowledgment of that amendment has been received. Training materials and qualifications of Shane Lowery have been reviewed and meet the requirements outlined by the NRC for the Radiation Safety Officer position. All information regarding the receipt, tracking, storage, and disposal of radioactive material at this facility, as well as the training of individuals and all other responsibilities of the primary Radiation Safety Officer have been communicated and officially transferred to the new RSO.
