

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

CAROLINA POWER AND LIGHT COMPANY

DOCKET NO. 50-261

H. B. ROBINSON STEAM ELECTRIC PLANT, UNIT NO. 2

AMENDMENT TO FACILITY OPERATING LICENSE

Amendment No. 80
License No. DPR-23

1. The Nuclear Regulatory Commission (the Commission) has found that:
 - A. The application for amendment by Carolina Power and Light Company (the licensee) dated October 25, 1983, as supplemented by letter dated March 5, 1984, complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act) and the Commission's rules and regulations set forth in 10 CFR Chapter I;
 - B. The facility will operate in conformity with the application, the provisions of the Act, and the rules and regulations of the Commission;
 - C. There is reasonable assurance (i) that the activities authorized by this amendment can be conducted without endangering the health and safety of the public, and (ii) that such activities will be conducted in compliance with the Commission's regulations;
 - D. The issuance of this amendment will not be inimical to the common defense and security or to the health and safety of the public; and
 - E. The issuance of this amendment is in accordance with 10 CFR Part 51 of the Commission's regulations and all applicable requirements have been satisfied.
2. Accordingly, the license is amended by changes to paragraph 3.F of Facility Operating License No. DPR-23 by adding the following paragraph after item (3):

Effective upon the date of this amendment, provisions of the Commission approved Physical Security, Guard Training and Qualification, and Safeguards Contingency Plans, including amendments made pursuant to the authority of 10 CFR 50.54(p) shall be temporarily replaced, during the steam generator replacement outage, by the following:

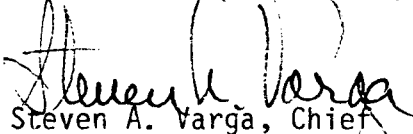

8405300728 840515
PDR ADOCK 05000261
P PDR

1. The H. B. Robinson Steam Electric Plant Guard Training and Qualification Plan shall continue in effect and be fully implemented and all guards fully trained and qualified,
2. The licensee shall continue to limit access into the protected area to persons who are employees or contractors of CP&L, and to other persons determined by CP&L to have legitimate business needs on the site,
3. The tamper indicating features of the alarm systems shall continue to remain active and shall be monitored during the interim period, and
4. Regarding the protection of the irradiated fuel stored in the spent fuel pool, the licensee shall:
 - a) Continue to maintain the central alarm station in a functional manner together with the ability to summon offsite assistance from the local law enforcement agencies. Access to the central alarm station shall be restricted to those persons associated with the alarm monitoring, assessment, response, maintenance, or related security functions,
 - b) Continue to maintain and operate the intrusion detection system associated with the spent fuel pool, and
 - c) Continue to provide security patrols.

Thirty days prior to loading fuel in the reactor vessel, the licensee shall place in effect and fully implement all provisions of the Commission's approved Physical, Guard Training and Qualification and Safeguards Contingency Plans, including all amendment made pursuant to 10 CFR 50.54(p).

3. This license amendment is effective as of the date of its issuance.
