MEMORANDUM FOR: Rules and Procedures Branch
Division of Rules and Records
Office of Administration and Resources Management

FROM: Office of Nuclear Reactor Regulation

SUBJECT: RESISTANCE TEMPERATURE DETECTOR SYSTEM

One signed original of the *Federal Register* Notice identified below is enclosed for your transmittal to the Office of the Federal Register for publication. Additional conformed copies (5) of the Notice are enclosed for your use.

- Notice of Receipt of Application for Construction Permit(s) and Operating License(s).
- Notice of Receipt of Partial Application for Construction Permit(s) and Facility License(s): Time for Submission of Views on Antitrust Matters.
- Notice of Consideration of Issuance of Amendment to Facility Operating License.
- Notice of Receipt of Application for Facility License(s); Notice of Availability of Applicant's Environmental Report; and Notice of Consideration of Issuance of Facility License(s) and Notice of Opportunity for Hearing.
- Notice of Availability of NRC Draft/Final Environmental Statement.
- Notice of Limited Work Authorization.
- Notice of Availability of Safety Evaluation Report.
- Notice of Issuance of Construction Permit(s).
- Notice of Issuance of Facility Operating License(s) or Amendment(s).
- Order.
- Exemption.
- Notice of Granting Exemption.
- Environmental Assessment.
- Notice of Preparation of Environmental Assessment.
- Other: _____

UNITED STATES NUCLEAR REGULATORY COMMISSIONCAROLINA POWER & LIGHT COMPANYDOCKET NO. 50-261NOTICE OF ISSUANCE OF AMENDMENT TOFACILITY OPERATING LICENSE

The U. S. Nuclear Regulatory Commission (the Commission) has issued Amendment No.121 to Facility Operating License No. DPR-23 to the Carolina Power & Light Company (the licensee), which revised the Technical Specifications for operations of the H. B. Robinson Steam Electric Plant, Unit No. 2, located in Darlington County, South Carolina. The amendment is effective as of the date of its issuance.

The amendment changes certain reator parameters to reflect the correct reacto coolant loop resistance temperature detector (RTD) system response time and to support the elimination of the RTD bypass system. The amendment also reduces the range of reactor operation over which the allowable Moderator Temperature Coefficient could be positive.

The application for amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments.

Notice of Consideration of Issuance of Amendment and Opportunity for Hearing in connection with this action was published in the FEDERAL REGISTER on August 16, 1988 (53 FR 30879).

Also in connection with this action, the Commission prepared an Environmental Assessment and Finding of No Significant Impact, which was published in the FEDERAL REGISTER on December 19, 1988 (53 FR 51021).

For further details with respect to the action, see (1) the application for amendment dated July 26, 1988, as supplemented August 26, and November 1, 1988, (2) Amendment No. 121 to Facility Operating License No. DPR-23, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 2120 L Street, N.W., Washington, D.C., 20555 and at the Hartsville Memorial Library, Nuclear Information Depository, 220 N. Fifth Street, Hartsville, South Carolina 29550.

Dated at Rockville, Maryland this 9th day of January 1989.

FOR THE NUCLEAR REGULATORY COMMISSION

Edward A. Reeves, Jr., Acting Project Director
Project Directorate II-1
Division of Reactor Projects I/II
Office of Nuclear Reactor Regulation
