Docket No. 50-261
License No. DPR-23

Carolina Power and Light Company
ATTN: Mr. Lynn W. Eury
Executive Vice President
Power Supply
P. O. Box 1551
Raleigh, NC 27602

Gentlemen:

SUBJECT: NRC INSPECTION REPORT NO. 50-261/90-06

This refers to the Nuclear Regulatory Commission (NRC) inspection conducted by B. Breslau on April 2 - 5, 1990. The inspection included a review of activities authorized for your H. B. Robinson facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed Inspection Report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

Within the scope of the inspection, violations were not identified. However, the inspection findings indicate that certain activities deviate from a commitment to the NRC. The NRC views the failure to complete corrective actions in a timely manner as a serious matter. This warrants increased management attention to assure adequate responsiveness to NRC issues. Your subsequent letter of April 6, 1990, indicates management is taking action to address the breakdown in the commitment tracking program. Since management has taken a responsible position towards correcting the program deficiencies, including attention to the cause for management's failure to recognize the commitments, no Notice of Deviation will be cited.

In accordance with 10 CFR 2.790(a), a copy of this letter and its enclosure will be placed in the NRC Public Document Room.

Should you have any questions concerning this letter, please contact us.

Sincerely,

(ORIGINAL SIGNED BY A. F. Gibson)

Albert F. Gibson, Director
Division of Reactor Safety
