Nathan et al.

Swagata Som has raised a concern that is detailed below. I believe she raised this issue during one of our previous calls, or at least, if items were deleted, we needed to know the reason why. Can you please respond and also plan to discuss during the 6/30 call. Thanks.

I have a question: Refer to Page 8.3-28 of the updated Rev 7 – Interim version; Areva has deleted ""and power factors of 85% or less". We had earlier requested the reason for deleting it. They have not provided any reason so far.

According to RG 1.9, Under C. Regulatory Position, Page 5, Section 1.2, *the power factor of 85% or less* is provided as the characteristics of the emergency Diesel generators.

Please obtain a confirmation that they will not deviate from the RG 1.9 guidance.
