**Subject:** Fermi Chapter 2.5 PROP determination

Mike:

The Fermi safety evaluation (SE) without open items and the **courtesy** transmittal cover letter are attached for Chapter 2.5, "Geology, Seismology, and Geotechnical Engineering."

Each page of the SEs are conservatively marked as proprietary until either: (1) 10 days have passed and the NRC has not heard from DTE Electric Company regarding the proprietary claim, or (2) DTE informs the NRC project manager that there is no proprietary information in the document. Once it is clear that there is no proprietary information in the document, the proprietary markings will be removed and distribution for the document will be completed and made public available.

Thanks  
Tekia
