SUBJECT: FERMIL UNIT 3 COMBINED LICENSE APPLICATION – ADVANCED FINAL SAFETY EVALUATION FOR SECTION 13.6, “PHYSICAL SECURITY”

Dear Mr. Smith:

The U.S. Nuclear Regulatory Commission (NRC) staff is preparing an advanced final safety evaluation (AFSE) for each chapter of the Fermi Unit 3 Combined License Application submitted by DTE Electric Company on September 18, 2008.

The staff’s AFSE for Section 13.6, “Physical Security” is being provided to the Advisory Committee on Reactor Safeguards (ACRS) subcommittee but will not be presented in any upcoming meetings of the ACRS subcommittee.

The enclosed AFSE is being provided only to DTE Electric Company for review of proprietary information pursuant to Title 10 of the *Code of Federal Regulations* (10 CFR) 2.390 “Public Inspections, Exemptions, Requests for Withholding.” The staff concludes that the enclosed AFSE does not contain any information for which exemption from public disclosure has been sought or approved or any factual errors. However, the NRC will withhold the enclosed AFSE from public disclosure for ten business days from the date of this letter to allow you the opportunity to verify the staff’s conclusion that the AFSE contains no such exempt information or any factual errors. If within that ten day period, you do not request that all or portions of the AFSE be withheld from public disclosure, the enclosure will be made available for public inspection through the NRC Public Document Room and the Publicly Available Records component of NRC’s Agencywide Documents Access and Management System and placed on the NRC’s public web page for this application.

**Document transmitted herewith contains sensitive unclassified information. When separated from the enclosure, this document is “DECONTROLLED.”**

P. Smith
