Paducah Gaseous Diffusion Plant (PGDP) Docket No. 70-7001, Certificate No. GDP-1 Transmittal of DOE/NRC Form 741

Dear Mr. Siurano-Perez:

The purpose of this letter is to provide the U.S. Nuclear Regulatory Commission (NRC) with the DOE/NRC Form 741 documenting the transfer of depleted uranium (DU) from the United States Enrichment Corporation (USEC) to the Department of Energy (DOE). USEC letter GDP 13-0021 dated December 19, 2013, submitted changes to the Decommissioning Funding Program Description (DFP) and Depleted Uranium Management (DU) Plan for NRC approval. The changes reflect a reduction in the decommissioning financial assurance required by NRC as a result of the transfer of title from USEC to DOE of all remaining DU for which USEC had responsibility for disposition at PGDP.

The June 12, 2012, Cooperative Agreement to support continued development and demonstration of the American Centrifuge Cascade Demonstration Test Program provided for the transfer of the title and responsibility for disposition from USEC to DOE of up to 39,200 MT of DUF₆. USEC previously transferred 38,317 MT DUF₆ to DOE. The transfer to DOE of an additional 322 MT of DUF₆ was completed on May 29, 2014, and is documented on the enclosed DOE/NRC Form 741. USEC has no remaining decommissioning liability for disposition of DU at PGDP.

If you have any questions, please contact me at (301) 564-3250.

Sincerely,

Steven A. Toelle

Director, Regulatory Affairs
