Docket No. 50-261
License No. DPR-23

Carolina Power and Light Company
ATTN: Mr. Lynn W. Eury
Executive Vice President
Power Supply
P. O. Box 1551
Raleigh, NC 27602

Gentlemen:

SUBJECT: NRC INSPECTION REPORT NO. 50-261/91-10

The NRC Systematic Assessment of Licensee Performance (SALP) has been completed for your H. B. Robinson facility. The facility was evaluated for the period January 1, 1990 through March 30, 1991. The results of the evaluation are documented in the enclosed Initial SALP Report. This report will be discussed with you at a public meeting to be held at H. B. Robinson on June 11, 1991, at 1:00 p.m.

The performance of your H. B. Robinson facility was evaluated in the functional areas of plant operations, radiological controls, maintenance/surveillance, emergency preparedness, security, engineering/technical support, and safety assessment/quality verification. The assessment indicated that the overall performance of H. B. Robinson was good and that radiological controls and security continued to exhibit superior performance.

The SALP Board recommendations in plant operations, maintenance/surveillance, emergency preparedness and engineering/technical support reflect the need for increased management attention. The NRC recognizes the challenges management faces in solving plant aging concerns. Accordingly, these challenges warrant increased attention and the timely implementation of the Technical Support Improvement Plan.

Any comments you have concerning our evaluation of the performance of your H. B. Robinson facility should be submitted to this office within 30 days following the date of our meeting. These comments will be considered in the development of the Final SALP Report. Your comments and a summary of our meeting will be issued as an appendix to the Final SALP Report.
