

NOV 26 1993

Docket No. 50-261  
License No. DPR-23

Carolina Power and Light Company  
ATTN: Mr. C. R. Dietz  
Vice President  
H. B. Robinson Steam Electric Plant  
Unit 2  
P. O. Box 790  
Hartsville, SC 29550-0790

Gentlemen:

SUBJECT: NOTICE OF VIOLATION  
(NRC INSPECTION REPORT NO. 50-261/93-26)

This refers to the inspection conducted by A. T. Boland of this office on October 25-29, 1993. The inspection included a review of activities authorized for your H. B. Robinson facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

Based on the results of this inspection, certain of your activities appeared to be in violation of NRC requirements, as specified in the enclosed Notice of Violation (Notice). The violations are of concern because the failure to adequately control keys to locked high radiation areas as well as properly secure highly irradiated materials could result in unnecessary and unplanned exposures to workers. The enclosed Inspection Report also identifies activities that violated NRC requirements that will not be subject to enforcement action because the licensee's efforts in identifying and/or correcting the violation meet the criteria specified in Section VII.B. of the Enforcement Policy.

You are required to respond to this letter and should follow the instructions specified in the enclosed Notice when preparing your response. In your response, you should document the specific actions taken and any additional actions you plan to prevent recurrence. After reviewing your response to this Notice, including your proposed corrective actions and the results of future inspections, the NRC will determine whether further NRC enforcement action is necessary to ensure compliance with NRC regulatory requirements.
