H. B. ROBINSON STEAM ELECTRIC PLANT, UNIT NO. 2
DOCKET NO. 50-261/LICENSE NO. DPR-23
REVISED RESPONSE TO SUPPLEMENT 1 TO GENERIC LETTER 87-02

Gentlemen:

The purpose of this letter is to revise our committed submittal date for the results of the implementation of the resolution of Unresolved Safety Issue (USI) A-46, "Verification of Seismic Adequacy of Mechanical and Electrical Equipment in Operating Reactors," for the H. B. Robinson Steam Electric Plant (HBRSEP), Unit No. 2.

Carolina Power & Light Company's response, dated September 19, 1992, to Supplement 1 to Generic Letter 87-02 provided an initial submittal date of 120 days after Refueling Outage 15 for the USI A-46 summary report. This was subsequently revised to December 31, 1994, by letter dated October 15, 1992. Evaluations are nearing completion; however, due to the interrelationship between the USI A-46 results and the seismic portion of the Individual Plant Examination of External Events (IPEEE), we are revising our submittal date for the USI A-46 summary report to coincide with the submittal of the IPEEE results, currently scheduled for June 30, 1995.

Questions regarding this matter may be referred to Mr. K. R. Jury at (803) 383-1363.

Very truly yours,

R. M. Krich
Manager - Regulatory Affairs
