Docket 50-57
License R-77

U.S. Nuclear Regulatory Commission
ATTN: Document Control Desk
Washington, D.C. 20555 -0001

Dear Sir or Madam:

This submission is in follow up to previous submissions, dated June 5th and May 22nd, 2014, detailing supplemental information and data to address comments provided by ORISE and the N.R.C. regarding building release surveys performed at the University at Buffalo's Buffalo Materials Research Center to prepare the building for demolition.

During conference calls, some issues were discussed that required further clarification.

Attached is a letter and data from the University's Decommissioning Management Contractor, Enercon to Mr. Dave Vasbinder detailing supplemental information addressing those issues that were identified.

We have also provided courtesy copies of this information to our Project Manager, Ted Smith and Region 1 Inspector, Steve Hammann as well as to ORISE.

If you have any questions or wish further information, please contact me at (716) 829-3301 or dvasbind@buffalo.edu.

Sincerely,

David R. Vasbinder
Director, Buffalo Materials Research Center

Cc: Ted Smith, U.S.N.R.C. Project Manager
Steve Hammann, NRC Region 1
Nick Altic, ORISE
