Subject: RE: PRM-73-17

Dear Mr. Beall:

Thank you. As I have no corporation to acquire, and then manage the implementation of my malware-blocking hardware, have you any suggestions? Do you, or do others in NRC, have connections with CEOs of appropriate corporations, such as Boeing, Raytheon, NorthropGrumman, Lockheed Martin, General Dynamics, Hewlett-Packard? A search for "cyber security" done on the websites of each of these firms results in page after page of accessions showing how active the firm is in cyber security activities (all software technology, of course). Recently, the CEO of IBM took interest, but her *evaluation team*, after several weeks, came back with rejection as the proposal being "hardware-intensive," despite the fact that in my initial email to the CEO it was specifically described as being non-software.

Without a capable acquiring corporation, I infer that the U.S. Government will have to take on the task.

Sincerely,

Alan Morris

Dear Mr. Morris: We have tentatively schedule the presentation your petition to the Petition Review Board in the 4th quarter of this year. The actual date will not be set until early fall.

Thanks.....
