Mr. Kenji Tateiwa
Manager, Nuclear Power Programs
Tokyo Electric Power Company
Washington Office
2121 K Street, NW Suite 910
Washington, DC 20037

Dear Mr. Tateiwa:

I would like to sincerely thank you for traveling to the U.S. Nuclear Regulatory Commission (NRC) headquarters in Rockville, Maryland, to present a seminar on "Tackling Water Issues at Fukushima Dai-ichi" hosted by the Office of Nuclear Regulatory Research (RES). We also greatly appreciate the time you spent with our technical staff both prior to and following your presentation to inform them on ground-water monitoring and modeling activities, innovative remediation technologies, and robotics being used to identify and characterize radionuclide releases and to answer their questions on TEPCO's remediation strategy and program.

Feedback from our staff indicates they learned a great deal from your videos, presentation slides, and technical responses to the audience's questions. The NRC audience was especially impressed with the timely information on the challenges of implementing your multifaceted remediation program. As noted in the Chairman's introductory remarks, we are very appreciative of the openness and sharing of lessons learned during the post-accident recovery program. These lessons are very timely and important to our regulatory program in understanding decommissioning and residual radionuclide contaminant issues.

We hope that your interactions with our technical staff, particularly your pre-seminar conversation with our technical staff, were mutually beneficial. We appreciate the time and effort you took to prepare and deliver your presentation and especially your willingness to provide follow-up communication on this important topic. We hope that this collaboration with NRC will continue.

Sincerely,

/RA/

Michael F. Weber
Deputy Executive Director
for Transformation, Project Aim 2020
Office of the Executive Director for Operations
