LOSS OF NORMAL FEEDWATER TRANSIENT ANALYSIS

Dear Mr. Varga:

In Carolina Power & Light Company's (CP&L) letter to you, dated July 23, 1982, CP&L tentatively committed to submit to the Nuclear Regulatory Commission (NRC) by October 31, 1982 a more detailed analysis of the loss of normal feedwater transient for the H. B. Robinson Plant (HBR). Subsequent to that commitment CP&L's contractor has taken more time than originally planned in developing and debugging the computer model. Consequently, CP&L has determined that it will be necessary to delay submittal to the NRC by approximately one month. As such CP&L will submit the required analyses by November 30, 1982.

Carolina Power & Light Company regrets this delay in schedule and is attempting to expedite the completion and review of this analysis. Should you have any questions regarding this information, please contact a member of my staff.

Yours very truly,

S. R. Zimmerman
Manager
