LICENSE NO. DPR-23
NUREG 0737 ITEM III.D.3.4
CONTROL ROOM HABITABILITY

Dear Mr. Varga:

Carolina Power and Light Company (CP&L) has received your letter dated October 1, 1982 regarding our response to NUREG 0737 Item III.D.3.4, Control Room Habitability, for H. B Robinson Unit 2 (HBR2). We have reviewed your request and have contacted the original contractor to determine the scope of work involved in addressing each deficiency described in the "Control Room Habitability Evaluation - H. B. Robinson Steam Electric Generating Plant" enclosed in our letter of December 31, 1980. The contractor will be providing a technical basis for each deficiency for which corrective actions and modifications are not justifiable, in addition to the cost benefit analysis for each respective deficiency; and providing preliminary engineering work for each deficiency for which corrective actions and modifications are justifiable. Included in the scope of work will be the deficiencies for which we proposed modifications and corrective actions in our letter of December 31, 1980. Accordingly, we have determined that we cannot adequately respond to your request within the time frame requested. We anticipate, however, submitting our response on or before June 1, 1983. We will provide a schedule for implementation of any modifications and corrections found necessary with our response.

If you have any questions regarding this matter, please contact a member of my staff.

Yours very truly,

S. R. Zimmerman
