MITIGATION OF CORE DAMAGE TRAINING

Gentlemen:

Carolina Power & Light Company hereby submits a revised commitment concerning requalification training for mitigating core damage (MCD) in response to NUREG-0737, Item II.B.4. Carolina Power & Light Company's original commitments to this item were addressed in various correspondence to the Nuclear Regulatory Commission and were reviewed and verified acceptable by your Safety Evaluation Report dated April 18, 1983. In response to your request for additional information dated February 10, 1983, CP&L responded on March 17, 1983 with the details of our MCD training program for managers and technicians in the Instrumentation and Control, Health Physics and Chemistry organizations at the H. B. Robinson Plant. Carolina Power & Light Company also indicated that although no requirement for retraining of the above personnel was found in NUREG-0737, Item II.B.4 or Mr. Denton's letter dated March 28, 1980, if review determined retraining to be beneficial, it would be incorporated in the HBR training program.

Carolina Power & Light Company hereby restates to commitments regarding the personnel being provided requalification training for MCD. Shift Technical Advisors and operating personnel from the Plant General Manager through the operations chain including licensed operators will complete MCD training. Only licensed operators will receive annual retraining per the licensed operator requalification program. Managers and technicians in the Instrumentation and Control, Health Physics, and Chemistry Sections will receive training commensurate with their responsibilities, but will not receive retraining.

The above commitments concerning retraining for MCD supersede the Company's previous commitments transmitted by letter dated March 17, 1983.
