H. B. ROBINSON STEAM ELECTRIC PLANT UNIT NO. 2
DOCKET NO. 50-261
LICENSE NO. DPR-23

REQUEST FOR LICENSE AMENDMENT - ADMINISTRATIVE CONTROLS

Dear Mr. Varga:

Summary

In accordance with the Code of Federal Regulations, Title 10, Part 50.90 and Part 2.101, Carolina Power & Light Company (CP&L) hereby requests revisions to the Technical Specifications for its H. B. Robinson Steam Electric Plant (HBR) Unit No. 2. These revisions reflect corporate organizational changes, plant organizational changes, and changes in the Plant Nuclear Safety Committee (PNSC).

Details

The organizational changes are reflected in Figures 6.2-1 and 6.2-2.

The scope of the Plant Nuclear Safety Committee activities as previously described in the Technical Specifications will continue to be performed; however, in order to provide for a more defined program of review and management overview of the facility operation, some of the responsibilities of PNSC have been specifically delegated to designated members of plant management.

This approach will allow the management staff to provide a more deliberate and decisive overview of the plant operation by having PNSC function through the use of other means as indicated in Section 6.5.1.5. This type of approach is consistent with that indicated by the Performance Appraisal Branch inspections conducted at our Brunswick facility and other facilities.

The procedure review and approval process is consistent with that recommended by Regulatory Guide 1.33 and ANS/ANSI N3.2.

The attached package contains Section 6 of Technical Specifications. The entire section is included for clarity even though some pages are not revised; changes are indicated by vertical lines in the right-hand margins of the affected pages.

The requested technical specifications changes constitute one Class III amendment in accordance with 10CFR170.22. Accordingly, our check for \$4000 is enclosed.

It is requested that you expedite your review of these requested changes in order to permit CP&L to implement these revised Quality Assurance and on-site and off-site safety review functions which we feel will enhance the safe operation of HBR. We are anxious to implement these changes and wish to avoid the substantial period of time approval of such changes has historically taken. If a meeting with your Staff to discuss these changes would be helpful in this regard, we will be glad to meet with your staff on a prompt basis.

Should you have any questions regarding this matter, please contact my staff.

Yours very truly,

E. E. Utley
