Subject: Follow-up Email to 24 hr Verbal Notification of Unplanned Wellfield Release
Date: Friday, July 18, 2014 10:36:58 AM

This morning I contacted and left voice mail messages with Mr Larner, LQD and Mr. Linton, NRC regarding the unplanned release. This email is a follow up to the verbal notification.

Yesterday afternoon an unplanned wellfield release was reported within the wellfield, in the vicinity of Header House 2, originating from recovery well N1A-002. The following information is known at this time:

- The initial estimated volume released is approximately 3,500 gallons.
- The fluid entered a drainage and appears to have released outside of the permit boundary.
- Soil, fluid and air samples have been collected accordingly. Fluid sample analysis indicates that the U3O8 content is approximately 33 ppm.
- The cause of the unplanned release appears to be from a pipeline break but further investigation is pending.
- The location of the unplanned release is T76W, R43N, Section 7, SESE – the unplanned release has been surveyed.

A written report will be submitted to the regulatory agencies within 5 business days of this notification, providing additional details and potential corrective actions. The online spill report will be completed for Mr. Hunter, WQD.

Should you have any questions, please contact myself or Mike Thomas, VP Regulatory and Public Affairs at 307-232-6673.

Regards,

Dawn Kolkman
