Subject: License 45-25551-01, Docket No. 030-35668, Control No. 584161.

Mr. John Miller,

This letter requests a correction to the memorandum dated Jun 18, 2014 for an amendment change to License 45-25551-02 (Attachment B). Per my conversation with an Eckert and Zeigler representative it appears that the specific Sr-90 calibration disk type source is no longer manufactured. We are no longer requesting the addition of the Sr-90/Y-90 calibration source and the item highlighted in **bold** below should be omitted.

Proposed revision to license items 6-8:

6. Byproduct, source, and/or special nuclear material	7. Chemical and/or physical form	8. Maximum amount that licensee may possess at any one time under this license	Comments/Purpose or change
A. Cs-137	Sealed Source Eckert and Zeigler (Isotope Products Laboratory) Model HEG Series, Capsule Type 3000	Not to exceed 50 millicuries per source and 100 millicuries total	New line item: Teaching & Training, Will not be used on humans or animals
<b>B. Sr-90/Y-90</b>	<b>Calibration Source</b>	<b>Not to exceed 0.1 microcurie per source or 1 microcurie total</b>	<b>New line item: Instrument calibration</b>

If there are any questions or additional information needed, please contact Mr. Michael Hinton at (703) 767-0295 or [michael.hinton@dtra.mil](mailto:michael.hinton@dtra.mil)

Sincerely,
