

UNITED STATES
NUCLEAR REGULATORY COMMISSION

REGION III
2443 WARRENVILLE RD. SUITE 210
LISLE, IL 60532-4352

JUL 21 2014

Michael Foley
Radiation Safety Officer
Palmerton & Parrish, Inc.
4168 W. Kearney
Springfield, MO 65803

Dear Mr. Foley:

Enclosed is Amendment No. 12 renewing your NRC Material License No. 24-25998-01 in accordance with your request. Please note that the changes made to your license are printed in **bold font**.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

As we discussed by telephone on July 18, 2014, if you wish to remove the authorization for the Humbolt Scientific Model 5001 Series moisture/density gauges and the Troxler Model 4640 Series density gauges from your license, please provide the additional information in the enclosed request for additional information.

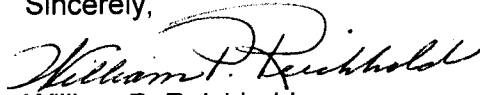

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

M.Foley

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

William P. Reichhold
Materials Licensing Branch

License No. 24-25998-01
Docket No. 030-30927
Enclosure: Amendment No. 12
Additional Information

Additional Information

If you wish to remove from the license, the authorization for a nuclear gauge(s) that were disposed/transferred, please provide the following information:

- a. Where was the nuclear gauge(s) sent for disposal or transfer?
- b. A copy of the leak test results that was current for the sealed sources when the nuclear gauge(s) were sent for disposal/transfer.
- c. Please submit a copy of the acknowledgement letter that the radioactive materials were received by the company where the nuclear gauge(s) were shipped for transfer/disposal.
- d. If you wish to remove the authorization for a nuclear gauge that is listed on that license that you never possessed, please send a statement that you had never received or possessed that nuclear gauge with your request to remove the authorization for the nuclear gauge from the license.
