SUBJECT: J. F. ALLEN COMPANY, LICENSE AMENDMENT, CONTROL NO. 584164

Dear Mr. Hadjis:

This refers to your license amendment request dated June 16, and July 18, 2014. Enclosed with this letter is the amended license.

NRC policy does not have provision for an alternate/secondary Radiation Safety Officer (RSO). Therefore, Jamie L. Robinson could not be listed as such on your license. However, a licensee may designate any additional personnel to assist the named RSO in his/her tasks, but the named individual remains ultimately responsible for implementing the licensee's radiation safety program.

Please note that NRC policy requires that all correspondence related to a license be signed by a member of the licensee's senior management rather than the RSO or a consultant. Your adherence to this requirement in your future correspondence with us will assist us in processing the correspondence in a timely manner.

Please review the enclosed document carefully and be sure that you understand and fully implement all the conditions incorporated into the amended license. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region I Office, Licensing Assistance Team, (610) 337-5239, so that we can provide appropriate corrections and answers.

An environmental assessment for this action is not required, since this action is categorically excluded under 10 CFR 51.22(c)(14).

Current NRC regulations and guidance are included on the NRC's website at www.nrc.gov; select **Nuclear Materials; Med, Ind, & Academic Uses**; then **Licensee Toolkits, see our toolkit index page**. You may also obtain these documents by contacting the Government Printing Office (GPO) toll-free at 1-866-512-1800. The GPO is open from 8:00 a.m. to 5:30 p.m. EST, Monday through Friday (except Federal holidays).
