SUBJECT: SUMMARY – SITE VISIT REGARDING PHYSICAL SECURITY
LICENSE AMENDMENT REQUEST FOR OYSTER CREEK
NUCLEAR GENERATING STATION

On July 22, 2014, the U.S. Nuclear Regulatory Commission (NRC) staff visited the Oyster Creek Nuclear Generating Station (OCNGS) located in Forked River, New Jersey, owned by the Exelon Generation Company, LLC (Exelon or the licensee).

The purpose of the site visit was to assess site conditions and review safeguards information related to the licensee's proposed alternative measures under the provisions of Title 10 of the *Code of Federal Regulations* (10 CFR), Section 73.55(r) for meeting the requirements of 10 CFR 73.55(e)(9). Exelon submitted a license amendment request (LAR) for OCNGS by letter dated December 19, 2013 (Agencywide Documents and Access Management System Accession No. ML13358A245). The site visit focused specifically on the licensee's technical basis supporting the alternative measures that must be provided under the provision of 10 CFR 73.55(r)(3).

Safeguards information was discussed during the site visit. Enclosure 1 contains a public version of the site visit, with security-related information redacted. Enclosure 2 contains security-related information and will be withheld from the public.

During this site visit, the NRC staff made no regulatory decisions regarding the merits of the proposed LAR regarding physical security at OCNGS.

Enclosure 2 transmitted herewith contains Security-Related Information. When separated from Enclosure 2, this document is decontrolled.
