Subject: amendment to SS&D GA 596-D-113-G, adding BWM-T

Jim --

I have finally been able to review your amendment request. Overall, the amendment request and supporting documentation are adequate. I do have a few questions regarding your amendment, however.

- 1) Please provide another copy of drawing 4-45424603-1. Some areas of the drawing are faint and hard to read.
- 2) Reference is made, in both the description and on one drawing, to the model BWM-L. Is this another model you wish to have reviewed?
- 3) No mention was made of any Prototype Testing performed on the BWM-H source holder. Please provide test data, or a justification that the BWM-H source holder is similar to a source holder that has been evaluated (i.e., the ASM/BWM or BWM-T source holders).
- 4) Who will be receiving copies of the section "Source Loading and Unloading for IQWeight BWM-H": Valmet service representatives/technicians, GL operators, etc.?
- 5) This review was performed based on all other information found in the current SS&D Registration Certificate remaining unchanged.

Also as a reminder, please ensure that listings of NRC Regions and Agreement States are current, as well as copies of pertinent regulations.

Upon receipt of answers to the above questions, I will be able to complete the review and issue the amended SS&D Registration Certificate.

If you have any questions, please call me at (404) 362-2675.

Sincerely,

Eric Jameson
Senior Radiological Health Specialist
