

**UNITED STATES  
NUCLEAR REGULATORY COMMISSION**  
WASHINGTON, D.C. 20555-0001

May 3, 2019

Holders of Licenses for Operating  
Power Reactors as Listed in the Enclosure

**SUBJECT: WITHDRAWAL OF CERTAIN POWER REACTOR SECURITY ORDERS  
APPLICABLE TO NUCLEAR POWER PLANTS**

Following the terrorist attacks on September 11, 2001, the U.S. Nuclear Regulatory Commission (NRC) supplemented the security measures required for protection against the design-basis threat at nuclear power reactor facilities through a series of security orders. These orders established new requirements for plant security, emergency preparedness, and training enhancements.

Following the issuance of the orders, each operating reactor licensee addressed the actions in the power reactor security orders in a response to the NRC. In its review of licensees' responses to the security orders, the NRC staff (the staff) found that licensees had incorporated many of the order requirements into their respective NRC-approved physical security, emergency preparedness, training and qualification, and safeguards contingency plans.

The NRC amended Title 10 of the *Code of Federal Regulations* (10 CFR) Parts 50, 52, 72, and 73, including Appendices B and C to Part 73, through a final rule ("Power Reactor Security Requirements") published in the *Federal Register* on March 27, 2009 (74 FR 13925). The rulemaking codified generically applicable security requirements previously issued by orders and updated the existing power reactor security requirements. The rule became effective on May 26, 2009. The NRC required licensees to be in compliance with the final rule no later than March 31, 2010.

The power reactor security rulemaking incorporated all or part of the requirements set forth in the following power reactor security orders:

- EA-02-026, "Order for Interim Safeguards and Security Compensatory Measures," dated February 25, 2002 (Partial)
- EA-02-261, "Order for Compensatory Measures Related to Access Authorization," dated January 7, 2003 (All)
- EA-03-039, "Order for Compensatory Measures Related to Training Enhancements on Tactical and Firearms Proficiency and Physical Fitness Applicable to Armed Nuclear Power Plant Security Force Personnel," dated April 29, 2003 (All)

Therefore, the NRC staff determined that the generically applicable security requirements set forth in the orders were adequately captured in the applicable NRC regulations, and the requirements of Orders EA-02-261 and EA-03-039 were withdrawn in their entirety, while the

requirements of Order EA-02-026 were withdrawn in part. Specifically, all requirements in Order EA-02-026 were withdrawn except Requirements B.1.a, B.5.d, and B.5.e.

Requirement B.5.d requires the licensee to review Safeguards and Emergency Plans and take actions to ensure that emergency onsite staffing, facilities, and procedures are adequate to accomplish actions necessary for response to terrorist threats. The Safeguards portion was previously addressed in security rulemakings through a final rule ("Power Reactor Security Requirements") published in the *Federal Register* on March 27, 2009 (74 FR 13925).

Requirement B.5.e requires the licensee to provide emergency action levels to ensure that a site-specific credible threat results in a declaration of at least a Notification of Unusual Event. It also requires the licensee to review and validate the strategy for escalation to higher event classifications.

The NRC subsequently amended the emergency preparedness regulations in 10 CFR Part 50, "Domestic Licensing of Production and Utilization Facilities," specifically, 10 CFR 50.47, "Emergency Plans," and Appendix E to 10 CFR Part 50, "Emergency Planning and Preparedness for Production and Utilization Facilities," through a final rule ("Enhancements to Emergency Preparedness Regulations") published in the *Federal Register* on November 23, 2011 (76 FR 72560). The rule became effective on December 23, 2011.

The three requirements in Order EA-02-026 that were not previously withdrawn had not been completely captured in regulations following the 2009 rulemaking. Requirements B.5.d (partially captured) and B.5.e (not captured) were incorporated into regulations via the November 2011 emergency preparedness final rule. Therefore, I hereby withdraw Requirements B.5.d and B.5.e of Order EA-02-026. The remaining requirement of Order EA-02-026 not covered by existing regulations (B.1.a) involves operator training and remains in effect.

Licensees should assess the impact that the withdrawal of these two requirements from Order EA-02-026 will have on their facility licenses and emergency plans to determine if any additional actions or changes are necessary to ensure compliance with the current regulatory requirements. Please contact your licensing project manager to facilitate resolution of any issue related to the information provided in this letter, or if you have any other questions.

Sincerely,

A handwritten signature in black ink that reads "Michel D. Evans" followed by a stylized "for" written in a cursive script.

Ho K. Nieh, Director  
Office of Nuclear Reactor Regulation
