

Risk Management Regulatory Framework (RMRF) Status

John Adams

Senior Level Advisor for Non-power Reactors

Division of Policy and Rulemaking

Office of Nuclear Reactor Regulation

U.S. Nuclear Regulatory Commission

August 6, 2014

- The NRC is considering adopting a statement of policy to establish a common RMRF that can be applied in a coherent manner to all NRC licensed uses of byproduct, source and special nuclear materials.
- Commission directed staff to address parts of NTTF Recommendation 1 in the RMRF working group.
- Recommendation 1 is applicable to only power reactors.

Change in direction

- Staff will suspend RMRF activities as they relate to licensees other than power reactors
- A paper to the Commission will present an RMRF approach for power reactors
- Implementation of a power reactor RMRF
- RMRF activities for the other licensees, including RTRs, will follow (est. 2-3 years)

RMRF
