DECLARATION OF Emily Warren IN SUPPORT OF CITIZENS'
RESISTANCE AT FERMI 2 (CRAFT)'S PETITION TO INTERVENE IN DOCKET NO. 50-
341 (FERMI 2'S LICENSE EXTENSION)

I, Emily Warren, declare as follows:

- I am a member of Pokagon Band which has treaty rights to hunt, fish, and gather in the area of the Fermi 2 nuclear reactor, owned by DTE Electric, a subsidiary of DTE Energy.
- I am concerned that if the NRC approves the proposed license extension, this would adversely affect my health and safety and the integrity of my quality of life.
- I am concerned that numerous species of plants, fish, wild game, and migratory birds, are being polluted by Fermi 2's discharge, making them inedible.
- I am concerned about the risks of a disaster on the scale of Fukushima, either by accident or sabotage, as well as, the dangers of spent fuel rods being stored onsite.
- I believe nuclear power is an outdated technology and should be replaced by sustainable energy sources; and that DTE is applying for this extension 11 years early because they know they could not obtain it a decade from now.
- In order to ensure that the licensing or permitting decision for the Fermi 2 proposed license extension protects my interest in a safe and healthy environment, I have authorized CRAFT to act on my behalf to ensure the permitting proceedings and any associated rulemaking proceedings are conducted fairly, efficiently, and in a manner that provides the full consideration of issues that could affect my safety and health, and the health of the environment we leave for future generations.
- In the event that CRAFT is not granted leave to intervene as my representative, I seek to intervene individually.

I declare under that the foregoing facts are true and correct and that any expressions of opinion are based on my judgment.

BEFORE THE COMMISSION

DECLARATION OF Nina Stowell IN SUPPORT OF CITIZENS' RESISTANCE AT FERMI 2 (CRAFT) PETITION TO INTERVENE IN DOCKET NO. 50-341 (LICENSE EXTENSION)

I, Nina Stowell, declare as follows:

- I reside at 17389 Five Points Redford MI, 48240 which is within 50 miles of the Fermi 2 nuclear reactor, owned by DTE Electric, a subsidiary of DTE Energy.
- I am concerned that if the NRC approves the proposed license extension, this would adversely affect my health and safety and the integrity of my quality of life.
- I am concerned about the risks of a disaster on the scale of Fukushima, either by accident or sabotage; I am also concerned about the dangers of storing spent fuel onsite.
- I believe nuclear power is an outdated technology and should be replaced by sustainable energy sources. I believe that DTE is applying for this extension 11 years early because they know they could not obtain it a decade from now.
- In order to ensure that the licensing or permitting decision for the Fermi 2 proposed license extension protects my interest in a safe and healthy environment, I have authorized CRAFT to act on my behalf to ensure the permitting proceedings and any associated rulemaking proceedings are conducted fairly, efficiently, and in a manner that provides the full consideration of issues that could affect my safety and health, and the health of the environment we leave for future generations.
- In the event that CRAFT is not granted leave to intervene as my representative, I seek to intervene individually.

I declare that the foregoing facts are true and correct and that any expressions of opinion are based on my judgment.
