

SOUTH CAROLINA ELECTRIC AND GAS COMPANY

SOUTH CAROLINA PUBLIC SERVICE AUTHORITY

DOCKET NO. 52-028

VIRGIL C. SUMMER NUCLEAR STATION UNIT 3

AMENDMENT TO FACILITY COMBINED LICENSE

EXEMPTION FROM REGULATIONS SET FORTH IN

APPENDIX D OF 10 CFR PART 52

Exemption
License No. NPF-94

1. In a letter dated March 19, 2014, and supplemented by the letters dated June 3, June 20, and July 9, 2014, South Carolina Electric and Gas Company (licensee) requested from the U.S. Nuclear Regulatory Commission (Commission) an exemption from the provisions of Title 10 of the *Code of Federal Regulations* (10 CFR) Part 52, Appendix D, Section III.B, "Design Certification Rule for the AP1000 Design, Scope, and Contents," as part of license amendment request (LAR) 13-34, "Reclassification of Portions of Human Factors Verification and Validation of Planning Documents" (LAR 13-34).

For the reasons set forth in Section 3.1 of the NRC staff's Safety Evaluation, which can be found at Agencywide Documents Access and Management System Accession Number ML14252A153, the Commission finds that:

- A. the exemption is authorized by law;
- B. the exemption presents no undue risk to public health and safety;
- C. the exemption is consistent with the common defense and security;
- D. special circumstances are present in that the application of the rule in this circumstance is not necessary to serve the underlying purpose of the rule;
- E. the special circumstances outweigh any decrease in safety that may result from the reduction in standardization caused by the exemption; and
- F. the exemption will not result in a significant decrease in the level of safety otherwise provided by the design.

2. Accordingly, the licensee is granted an exemption to the provisions of 10 CFR Part 52, Appendix D, Section III.B, to allow deviations from the certified Design Control Document (DCD) Tier 2* information, as described in the licensee's request dated March 19, 2014, and supplemented by the letters dated June 3, June 20, and July 9, 2014. This exemption is related to, and necessary for the granting of License Amendment No. 18, which is being issued concurrently with this exemption.
3. As explained in Section 5 of the NRC staff's Safety Evaluation (ADAMS Accession Number ML14252A153), this exemption meets the eligibility criteria for categorical exclusion set forth in 10 CFR 51.22(c)(9). Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment needs to be prepared in connection with the issuance of the exemption.
4. This exemption is effective as of the date of its issuance.

FOR THE NUCLEAR REGULATORY COMMISSION:
