Chairman Macfarlane

Thank you for inviting me to participate in your briefing. I am honored to have had the opportunity to address the Commission on Low-Level Radioactive Waste Management and Disposal.

I also want to complement your staff. Rochelle did an outstanding job helping me get connected for meeting and working with my Power Point presentation. She is a very dedicated and efficient government employee. Melanie Wong continues to do an outstanding job working with us on our licensing questions. Set met us early on Thursday morning to get us into the building and then orchestrated an extremely beneficial meeting in the afternoon after the briefing. We feel fortunate to have the contact with Melanie for our program here in Texas.

Two other staff members I want to mention to you are Laura Dudes and Larry Camper. I am sure you are fully aware of their skills and the level of excellence they bring to NRC's regulatory program. Laura was extremely helpful with our recent audit and Larry has been very instrumental in helping us (particularly me) in understanding some of the rulemaking questions we are considering.

Thank you,
Charles
