Discussion:

On 9/5/2014, I contacted the RSO to inquire about the use and storage of the Cs-137 sealed source associated with the use of the Tracerco Discovery Source Container. I asked the RSO if the source will be co-located with any of the other sources currently listed on the license. We discussed the potential that if the source were co-located with any of other radioactive material at a Tracerco NRC permanent storage facility, that action would result in a Category 2 quantity of radioactive materials requiring the implementation of Increased Controls or compliance with 10 CFR Part 37. The RSO was well aware of the Increased Controls regulations. The RSO confirmed that the source will not be co-located with any other radioactive material at a Tracerco NRC permanent storage facility and will submit his statement in writing.

On 9/5/2014, the RSO submitted a letter regarding the above paragraph. The letter will be included in License Condition 19 of the license.

Action Required: Submit Telecom record and letter to LAT and process amendment.
