Re: License Amendment Radioactive Materials License No. 24-26162-01

Dear Ms. Sara Forster:

I would like to request an amendment to Radioactive Material License No. 24-26162-01 to authorize Construction Materials Testing Group, LLC to increase out total usage limits for radioactive materials. This request is to allow our company to purchase 1 additional moisture/density gauge. The amendment would increase our total usage limits as follows:

1. Increase total usage limits of Cs-137 to a maximum level of 77 mCi.
2. Increase total usage limits of Am-241:Be to a maximum level 308 mCi

We are currently in need of the additional gauge, so expediting this request to allow issue of the amendment by October 1, 2014 is appreciated. Please let me know if I can provide any additional information.

Sincerely,
Construction Materials Testing Group, LLC

K. Erik Troy, P.E.
Lab Director

Forster, Sara

Ms. Forster,

Thank you for the phone call this morning. Attached is the letter you suggested. I have indicated a notification date of October 1, 2014 for the amendment.
