

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

October 7, 2014

LICENSEE: Tennessee Valley Authority

FACILITY: Watts Bar Nuclear Power Plant, Unit 1

SUBJECT: SUMMARY OF SEPTEMBER 24, 2014, TELECONFERENCE WITH
TENNESSEE VALLEY AUTHORITY REGARDING THE LICENSE
AMENDMENT REQUEST ON HYDROLOGY FOR WATTS BAR NUCLEAR
PLANT, UNIT 1

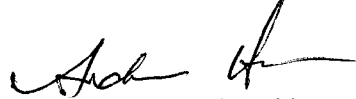

On September 24, 2014, a Category 1 public teleconference was held between the U.S. Nuclear Regulatory Commission (NRC) staff and representatives of the Tennessee Valley Authority (TVA). The purpose of this meeting was for TVA to present the status and content of their planned hydrology analyses and submittal to supplement a license amendment request for Unit 1.

TVA staff said that the submittal date of September 30, 2014, will be met. The parts of the submittal include a cover letter and numerous enclosures. TVA indicated that the electronic viewing room has been set up and documents are loaded to the site for early viewing.

NRC staff asked if the topics previously discussed at the September 10, 2014, public meeting were addressed in the planned submittal. TVA confirmed that they would be. The NRC contractor from the Pacific Northwest National Laboratory said some of the files could not be opened because they were zip files. TVA said they would work on addressing these issues so the documents could be readily viewed.

No regulatory decisions were made at the meeting. No members of the public were in attendance via teleconference. No Public Meeting Feedback forms were received.

Please direct any inquiries to me at 301-415-8480 or via e-mail at Andrew.Hon@nrc.gov.
