SUBJECT: ISSUANCE OF RENEWED FACILITY OPERATING LICENSES FOR LIMERICK  
GENERATING STATION, UNITS 1 AND 2 (TAC NOS. ME6555 AND ME6556)

Dear Mr. Gallagher:

The U.S. Nuclear Regulatory Commission (NRC or the staff) has issued Renewed Facility Operating License Nos. NPF-39 (Unit 1) and NPF-85 (Unit 2) for the Limerick Generating Station (Limerick). The NRC issued the renewed facility operating license based on the staff's review of your application dated June 22, 2011, as supplemented by letters submitted to the NRC through June 4, 2014. The technical specifications for Limerick were not amended as a result of the NRC's review.

Renewed Facility Operating License No. NPF-39 for Unit 1 expires at midnight on October 26, 2044. Renewed Facility Operating License No. NPF-85 for Unit 2 expires at midnight on June 22, 2049.

The technical basis for issuing the renewed operating license is set forth in "Safety Evaluation Report Related to the License Renewal of the Limerick Generating Station, Units 1 and 2", dated January 10, 2013 and supplemented August 12, 2014. The results of the environmental review related to the issuance of the renewed license are given in NUREG-1437, Supplement 49, "Generic Environmental Impact Statement for License Renewal of Nuclear Plants, Regarding Limerick Generating Station," August 2014, and the record of decision (ROD).

Enclosure 1 and 2 contains Renewed Facility Operating License Nos. NPF-39 and NPF-85 with attachments, Appendix A, "Technical Specifications," and Appendix B, "Environmental Protection Plan," and Appendix C, "Additional Conditions."

Enclosure 3 is a copy of the related *Federal Register* notice of issuance of the renewed licenses. The staff has sent the original to the Office of the Federal Register for publication.

M. Gallagher
