RE: Amendment of License: 21-01078-01

To whom it may concern:

Please amend our radioactive material license as follows.

Two of our Authorized Users are no longer practicing at our facility. Richard K. Foster, MD and Charles Michael Wilkinson, MD should be removed as Authorized Users.

We wish to add an additional manufacturer for the Nucletron model 105.002 sources used in the high dose rate remote afterloader currently installed in our facility. The license should be amended as follows:

Source Description

Ir-192 sealed source

Nucletron Model 105.002 (Manufactured by: Mallinckrodt Medical, QSA Global (formerly AEA Technology) and Alpha Omega Services (AOS))

2 sources not to exceed 20.5 curries total; no single source activity to exceed 13 curries

The Sealed Source and Device Registry in support of the above source is NR-0497-S-107-S. A copy of the registry has been enclosed for your information.

Sincerely,

A handwritten signature in black ink that reads "Dale Schippers".

Dale Schippers
Radiation Safety Officer

A handwritten signature in black ink that reads "Earl Monks".

Earl Monks
Director of Radiology

Simmons, Toye

Attachments: NRC License Amendment 87 v2 Mercy Health Saint Mary's Sep2014.pdf

Attached is an updated amendment request. I added another supplier for our HDR source. Nucletron is switching vendors.

Thank you,
Dale
