**SUBJECT: SCHEDULE REVISION FOR THE ENVIRONMENTAL REVIEW OF THE
BYRON STATION AND BRAIDWOOD STATION LICENSE RENEWAL
APPLICATION – ENVIRONMENTAL REVIEW SCHEDULE (TAC NOS. MF1790,
MF1791, MF1792, AND MF1793)**

Dear Mr. Gallagher:

By letter dated May 29, 2013, Exelon Generation Company, LLC (Exelon), submitted an application pursuant to Title 10 of the *Code of Federal Regulations* (CFR) Part 54, to renew the operating licenses for Byron Station (Byron) and Braidwood Station (Braidwood), for review by the U.S. Nuclear Regulatory Commission (NRC) staff. This letter is to inform you of a change in the environmental review schedule for the Byron license renewal review.

On September 19, 2014, the Commission published its final rule for the Continued Storage of Spent Nuclear Fuel. As a result of resource commitments associated with implementing the final rule, the Byron environmental review schedule has changed. Enclosed is the revised schedule for the environmental review of the Byron license renewal application that ensures the final rule is accounted for in the supplemental environmental impact statement (SEIS). The schedule has been updated to reflect a change in the date of the issuance of the draft SEIS for Byron. The projected date for issuance of the draft SEIS for Byron is being revised from October 2014, to December 2014.

The projected issuance date for the final SEIS for Byron has not changed and is scheduled for July 2015. The projected issuance dates for the draft and final SEIS for Braidwood have not changed and are scheduled for January 2015, and September 2015, respectively. In addition, there is no change in the safety review schedule.

M. Gallagher
