SUBJECT: LA CROSSE BOILING WATER REACTOR - INDEPENDENT SPENT FUEL
STORAGE INSTALLATION – NRC SECURITY INSPECTION REPORT
NOS. 05000409/2014007(DNMS), 07200046/2014401(DNMS)

Dear Mr. Berg:

On September 16, 2014, the U.S. Nuclear Regulatory Commission (NRC) completed a security inspection of the physical security program for the La Crosse Boiling Water Reactor (LACBWR) Independent Spent Fuel Storage Installation (ISFSI) located near Genoa, Wisconsin. The purpose of the inspection was to evaluate whether the protection of the ISFSI was in compliance with Title 10 of the *Code of Federal Regulations* (CFR) Parts 72.212(b)(9), the ISFSI PSP (Addendum III of the LACBWR PSP), NRC Security Order EA-09-118, and your compliance with 10 CFR Parts 72.212(b)(9)(vi), 73.21 and 73.22 for the protection of safeguards information (SGI); the inspection included an in-office review completed on September 16, 2014. At the conclusion of the on-site inspection on September 11, 2014, and during a final exit meeting held by telephone on September 16, 2014, the inspector discussed the inspection findings with your site and ISFSI plant managers, and members of your security, licensing, and program management staff.

The inspection also examined activities conducted under your license as they relate to security and compliance with the NRC's rules and regulations and with the conditions of your license. The inspector reviewed selected procedures and records, observed activities, and interviewed personnel. The enclosed inspection report documents the inspection results.

Based on the results of this inspection, no findings of significance were identified.

**Enclosure Contains Sensitive Unclassified
Non-Safeguards Information. When
separated from the enclosure, this
transmittal document is decontrolled.**
