RE: Smith Ranch - Highland ISR Project, Permit No. 633: Storage Pond, Source of Leaks, and Liner Repair Plan TFN 5 5/331 and Storage Pond Leak Monthly Update.

Dear Mr. Garoutte:

Land Quality Division (LQD) is in receipt of the Final Monthly Storage Pond Monthly Update and the responses to LQD questions regarding the Storage Pond Liner Repair Plan. Both letters were received in this office October 9, 2014 under your cover letters dated October 8, 2014. Your letters provided a briefing on the Liner Repair Plan and the final monthly update. Based upon my review of your attached documentation this letter will serve as approval for TFN 5 5/331 and the acceptance of the final update. I have found no indication that the Permit No. 633 will be changed in any way due to TFN 5 5/331. No "Change Number" was assigned, so this information will be filed in the Correspondence File and no action will be needed to change your permit.

Please feel free to contact me if questions or concerns arise.

Respectfully,

Miles Bennett
Uranium Coordinator
