August 12, 2008

Mr. Mark Wesley, Manager, Planning Section
Michigan State Police
4000 Collins Road
Lansing, MI 48910

Subject: Fermi 3 Nuclear Power Plant Emergency Support Certification

Dear Mr. Wesley:

As previously indicated in public announcements and meetings, the Detroit Edison Company is developing a Combined License Application (COLA) for submittal to the U.S. Nuclear Regulatory Commission (NRC) in accordance with the requirements of 10 CFR 52 for a potential new Fermi 3 nuclear power plant. The COLA outlines Detroit Edison's plans for construction and operation of a proposed new power plant at the existing Fermi site near Newport, Michigan.

A key part of the COLA is the development of emergency plans which provide information sufficient to demonstrate compliance with pertinent regulatory requirements. The COLA will take credit for the federal, state, and local plans already in place that support Fermi 2, and will include an emergency plan which addresses onsite and offsite activities to support an additional plant. The support that would be required of the Michigan State Police associated with an additional new power plant is expected to be the same as is now required to support the existing Fermi 2 plant.

The COLA Emergency Plan includes a description of the emergency classification system for the new plant, as required by NRC regulations. Detroit Edison has worked with the nuclear industry to develop a set of initiating conditions and emergency action levels consistent with the emergency classification system and appropriate to the proposed new nuclear plant design. In addition, the Fermi site evacuation time estimate for has been updated with input from various state and local government agencies. The evacuation time estimate report is also included in the COLA.

Emergency planning provisions of 10 CFR 52 require that Detroit Edison obtain certifications from the state and local agencies with emergency planning responsibilities that the agency will participate in emergency planning and support emergency response to the proposed new plant, if constructed. At this time, we are seeking certification from the Michigan State Police that:

- The proposed emergency plans are practicable;
- The Michigan State Police are committed to participating in any further development of the plans, including any required field demonstrations; and
- The Michigan State Police are committed to executing their responsibilities under the plans in the event of an emergency.

The specific nature of the arrangements to support the emergency plan for the proposed Fermi 3 plant will be clearly established in an agreement that will be included in the Fermi 3 COLA Emergency Plan if and when Detroit Edison proceeds with construction and operation of the new plant. Your signature below also indicates that you concur with the emergency classification system (including the initiating conditions and emergency action levels) and evacuation time estimates proposed in the Fermi 3 Nuclear Plant COLA Emergency Plan.

The Michigan State Police's participation in these emergency planning efforts is greatly appreciated. If you have any questions or require further information, please contact me at (313) 235-3341.

Sincerely,

Peter W. Smith, Director
Nuclear Development-Licensing

Subject: Fermi 3 Nuclear Power Plant Emergency Support Certification

Dear Mr. Williams:

As previously indicated in public announcements and meetings, the Detroit Edison Company is developing a Combined License Application (COLA) for submittal to the U.S. Nuclear Regulatory Commission (NRC) in accordance with the requirements of 10 CFR 52 for a potential new Fermi 3 nuclear power plant. The COLA outlines Detroit Edison's plans for construction and operation of a proposed new power plant at the existing Fermi site near Newport, Michigan.

A key part of the COLA is the development of emergency plans which provide information sufficient to demonstrate compliance with pertinent regulatory requirements. The COLA will take credit for the federal, state, and local plans already in place that support Fermi 2, and will include an emergency plan which addresses onsite and offsite activities to support an additional plant. The support that would be required of the Monroe County Emergency Management Division associated with an additional new power plant is expected to be the same as is now required to support the existing Fermi 2 plant.

The COLA Emergency Plan includes a description of the emergency classification system for the new plant, as required by NRC regulations. Detroit Edison has worked with the nuclear industry to develop a set of initiating conditions and emergency action levels consistent with the emergency classification system and appropriate to the proposed new nuclear plant design. In addition, the Fermi site evacuation time estimate for has been updated with input from various state and local government agencies. The evacuation time estimate report is also included in the COLA.

Emergency planning provisions of 10 CFR 52 require that Detroit Edison obtain certifications from the state and local agencies with emergency planning responsibilities that the agency will participate in emergency planning and support emergency response to the proposed new plant, if constructed. At this time, we are seeking certification from the Monroe County Emergency Management Division that:

- The proposed emergency plans are practicable;
- The Monroe County Emergency Management Division is committed to participating in any further development of the plans, including any required field demonstrations; and
- The Monroe County Emergency Management Division is committed to executing their responsibilities under the plans in the event of an emergency.

The specific nature of the arrangements to support the emergency plan for the proposed Fermi 3 plant will be clearly established in an agreement that will be included in the Fermi 3 COLA Emergency Plan if and when Detroit Edison proceeds with construction and operation of the new plant. Your signature below also indicates that you concur with

the emergency classification system (including the initiating conditions and emergency action levels) and evacuation time estimates proposed in the Fermi 3 Nuclear Plant COLA Emergency Plan.

The Monroe County Emergency Management Division's participation in these emergency planning efforts is greatly appreciated. If you have any questions or require further information, please contact me at (313) 235-3341.

Sincerely,

Peter W. Smith, Director
Nuclear Development-Licensing

To: Mr. Peter W. Smith, Director, Nuclear Development-Licensing

Subject: Fermi 3 Nuclear Power Plant Emergency Support Certification

Date: August 22, 2008

This letter is to acknowledge that the Wayne County Department of Homeland Security and Emergency Management (DHSEM) is been made aware of and is participating the Detroit Edison Company's development of a Combined License Application (COLA) for a potential new Fermi 3 nuclear power plant.

Our office has reviewed the supplied COLA Emergency Plan including a description of the emergency classification system for the new plant, as required by NRC regulations. And in addition, we would like to thank you for the updated Fermi site evacuation time estimates; these are very helpful in evacuation planning.

The Wayne County Department of Homeland Security and Emergency Management proposes that the emergency plans are practicable; and the DHSEM is committed to participating in any further development of the plans, including a any required field demonstrations; and DHSEM is committed to executing their responsibilities under the plans in the event of an emergency.

We further understand that the specific nature of the arrangements to support the emergency plan for the proposed Fermi 3 plant will be clearly established in an agreement that will be included in the Fermi 3 COLA Emergency Plan if and when Detroit Edison proceeds with construction and operation of the new plant.

The Wayne County Department of Homeland Security and Emergency Management will continue to support on-going planning associated with the existing Fermi 2 plant and support additional new Fermi 3 power plant COLA emergency planning projects.

I concur with the emergency classification system (including the initiating conditions and emergency action levels) and evacuation time estimates proposed in the Fermi 3 Nuclear Plant COLA Emergency Plan.

Very truly yours

Mark A. Hammond, Deputy Director
Wayne County Emergency Managment Coordinator

Mr. James Grahek, Fire Chief
Frenchtown Charter Township Fire Department
6940 North Monroe Street
Monroe, MI 48162

Subject: Fermi 3 Nuclear Power Plant Emergency Support Certification

Dear Chief Grahek:

As previously indicated in public announcements and meetings, the Detroit Edison Company is developing a Combined License Application (COLA) for submittal to the U.S. Nuclear Regulatory Commission (NRC) in accordance with the requirements of 10 CFR 52 for a potential new Fermi 3 nuclear power plant. The COLA outlines Detroit Edison's plans for construction and operation of a proposed new power plant at the existing Fermi site near Newport, Michigan.

A key part of the COLA is the development of emergency plans which provide information sufficient to demonstrate compliance with pertinent regulatory requirements. The COLA will take credit for the current federal, state, and local plans already in place that support Fermi 2, and will include an emergency plan which addresses onsite and offsite activities to support an additional plant.

The purpose of this letter is to certify that existing agreements to support Fermi 2 will remain valid until revised to include support for the proposed Fermi 3 plant, and that the Frenchtown Charter Township Fire Department agrees to support the proposed new plant, if constructed. The support that would be required of the Frenchtown Fire Department associated with an additional new power plant is expected to be the same as is now required to support the existing Fermi 2 plant.

The specific nature of the arrangements to support the emergency plan for the proposed Fermi 3 plant will be clearly established in a properly executed and binding letter of agreement that will be included in the Fermi 3 COLA Emergency Plan if and when Detroit Edison proceeds with construction and operation of the new plant.

The Frenchtown Charter Township Fire Department's participation in these emergency planning efforts is greatly appreciated. If you have any questions or require further information, please contact me at (313) 235-3341.

Sincerely,

Peter W. Smith, Director
Nuclear Development-Licensing

Subject: Fermi 3 Nuclear Power Plant Emergency Support Certification

Dear Ms. Dragani:

As previously indicated in public announcements, the Detroit Edison Company has submitted a Combined License Application (COLA) to the U.S. Nuclear Regulatory Commission (NRC) in accordance with the requirements of 10 CFR 52 for a potential new Fermi 3 nuclear power plant. The COLA outlines Detroit Edison's plans for construction and operation of a proposed new power plant at the existing Fermi site near Newport, Michigan.

A key part of the COLA is the development of emergency plans which provide information sufficient to demonstrate compliance with pertinent regulatory requirements. The COLA takes credit for the federal, state, and local plans already in place that support Fermi 2, and includes an emergency plan which addresses onsite and offsite activities to support an additional plant. The support that would be required of the Ohio Emergency Management Agency associated with an additional new power plant is expected to be the same as is now required to support the existing Fermi 2 plant.

Emergency planning provisions of 10 CFR 52 require that Detroit Edison obtain certifications from the state and local agencies with emergency planning responsibilities that the agency will participate in emergency planning and support emergency response to the proposed new plant, if constructed. At this time, we are seeking certification from the Ohio Emergency Management Agency that:

- The proposed emergency plans are practicable;
- The Ohio Emergency Management Agency is committed to participating in any further development of the plans, including any required field demonstrations; and
- The Ohio Emergency Management Agency is committed to executing their responsibilities under the plans in the event of an emergency.

The specific nature of the arrangements to support the emergency plan for the proposed Fermi 3 plant will be clearly established in an agreement that will be included in the Fermi 3 COLA Emergency Plan if and when Detroit Edison proceeds with construction and operation of the new plant.

The Ohio Emergency Management Agency's participation in these emergency planning efforts is greatly appreciated. If you have any questions or require further information, please contact me at (313) 235-3341.

Sincerely,
